LOW ENVIRONMENTAL IMPACT

Holistically sustainable manufacturing & use of raw materials

When you choose Eva-Last, you're choosing the best solution for both you and the environment. Eva-Last products are the low-maintenance, reliable alternative to wood that consistently outperform timber and other composite materials. They're also the environmentally friendly material choice that is gentler on the Earth.

BAMBOO WASTES LESS & PROVIDES MORE

Eva-Last uses bamboo in its composite production. Bamboo can grow up to 30 times faster than timber and releases 35 percent more oxygen into our air than most hardwood trees. It can be made into composite with only 2 percent wastage (compared to over 80 percent wastage with timber) and is naturally antibacterial.

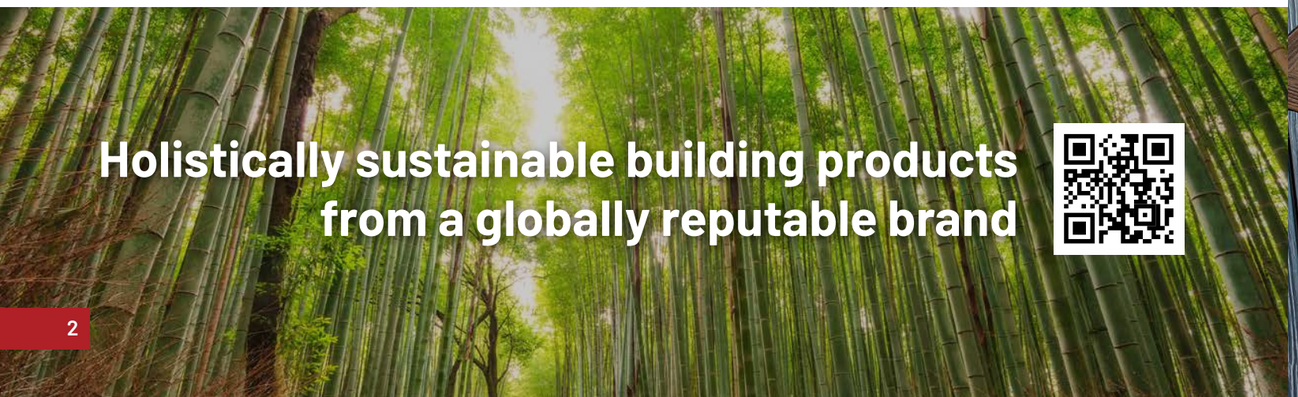
USE OF RECYCLED PLASTIC

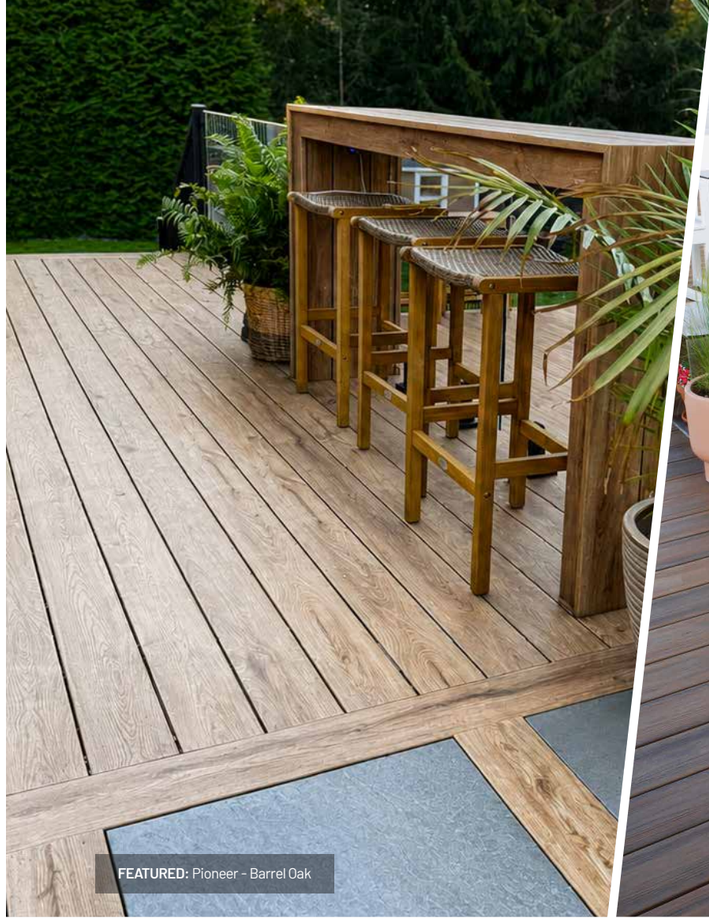
By using recycled waste plastics, in combination with easily replenishable bamboo fiber, we are able to produce a highly durable composite product while saving millions of tons of plastic from entering landfills and oceans. Every year Eva-Last recycles over 26,000 tons of plastic. Recycling one ton of plastic results in carbon dioxide savings of approximately 0.73 tons – the same as traveling nearly 2,500 miles in a car.

USE OF SOLAR POWER IN THE MANUFACTURING PROCESS

Traditional manufacturing is an energy-intensive endeavor. That's why Eva-Last took the decision to start moving towards manufacturing using solar energy. Since 2012, 32,858 solar panels, or 955,000 ft^2 of solar panels, have been installed. This leads to a saving of 2,000 tons of CO_2 every single day.

Eva-Last has been at the forefront of the green building industry since its inception in 2007. We are dedicated to consistently improving how we serve the environment and our clients. From the recycled and renewable raw ingredients we use to create our products, to the solar power we harness to manufacture, we are proud to offer holistically sustainable building products.





TECHNOLOGIES

Eva-Last has developed a resilient collection of bamboo composite technologies, each with its own unique characteristics and set of benefits. These versatile materials can be used in a variety of applications such as decking, stairs, trim, screening and wall cladding.

Pioneer

THE ART OF WOOD, WITHOUT THE IMPACT

The Pioneer range advances composite aesthetics with high-resolution digital replications of hardwoods and rare timbers.

ApexPLUS

REINFORCED, CAPPED BAMBOO FOAMED-PVC COMPOSITE

Apex PLUS offers you a resilient and natural-looking composite with a glass fiber-reinforced core, that allows for increased strength and span capability.

Infinity

CAPPED BAMBOO COMPOSITE

Infinity composite adds value and good looks to your outdoor space and to your lifestyle by giving you steadfast composite that lasts for decades.

Eva-tech

BAMBOO COMPOSITE

Eva-tech is a cost-effective bamboo composite. It offers reliable slip resistance, and is a low-maintenance alternative to timber.

HIGH PERFORMANCE BAMBOO COMPOSITE DECKING

FEATURED: Pioneer - Weathered Ipe

Pioneer

THE ART OF WOOD, WITHOUT THE IMPACT

The Pioneer range advances composite aesthetics with high-resolution digital replications of hardwoods and rare timbers, playing a vital role in preserving prized trees for future generations. A bamboo foamed-PVC and glass fiber-reinforced core provides increased strength and span capability and reduces expansion and contraction. The advanced wear layer protects the hardwood aesthetic against fading, scratches, and stains.

MADE WITH BAMBOO · MADE WITH BAMBOO · MADE WITH RECYCLED PLASTIC · MADE USING SOLAR ENERGY

REALISTIC AESTHETIC
Advanced digital replications of rare wood for an exceptionally natural look

ECO-FRIENDLY
Prevents deforestation by capturing the beauty of endangered timbers without felling

ATTAINABLE LUXURY
Enjoy the look of expensive rare woods in long-lasting composite

INCREASED SPAN
Reinforced for improved strength & span capability

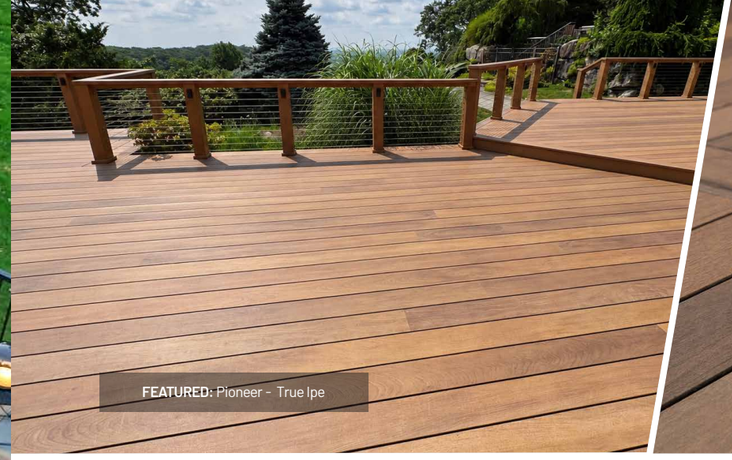
MORE STABLE
Less movement from expansion & contraction

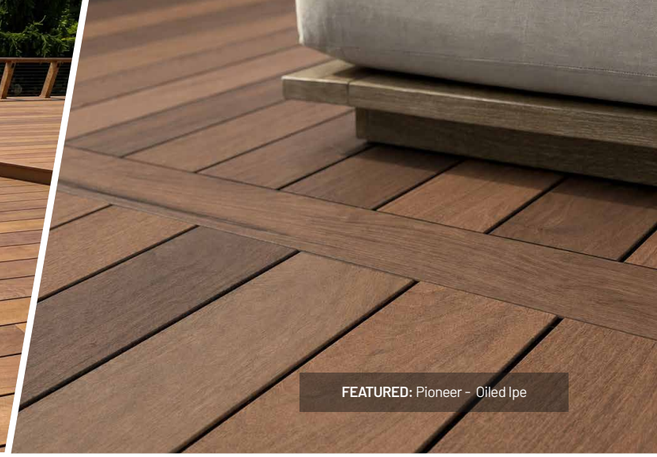
WEAR LAYER
Wear layer offers protection against stains, scratches, & fading

DECAY RESISTANT
Long-lasting & resists insects, moisture, & weather

LOW-MAINTENANCE
Enhanced surface for easy cleaning & optimal longevity

Pioneer





PRODUCT RANGE

Pioneer can be used as stunning outdoor decking or as open-joint cladding in vertical or wall applications. Grooved and starter board profiles come in two convenient widths, and fascia and riser boards complete the collection. All Pioneer boards work just like wood and can be cut using standard tools.

Cross section	Description	Dimensions	Lengths	Joist spacing	Fasteners
	Grooved board	**1 x 6** 0.83" x 5.70" actual	**12', 16', & 20'**	**Up to 24"**	Chain collated clip

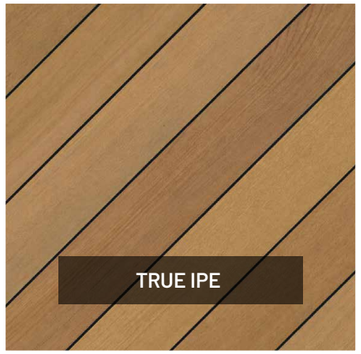
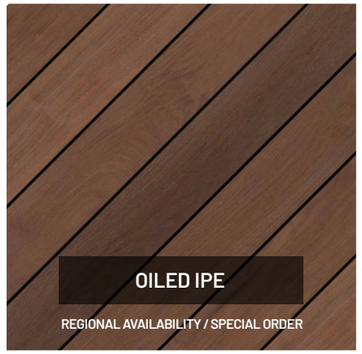
COLOR RANGE

Pioneer uses high-resolution digital replications of timber to create composite so natural looking that it's indistinguishable from prized exotic hardwood.

INDIGENOUS COLLECTION

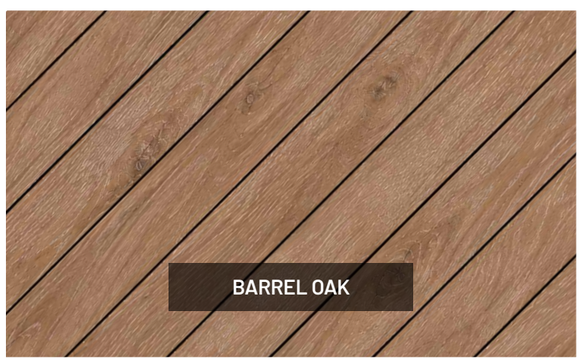
The Pioneer Indigenous Collection showcases high variegation in color and texture for a noteworthy and captivating authentic replication of hardwood timbers.





CLASSICS COLLECTION

The Pioneer Classics collection offers subtle variegation in color and texture for a refined aesthetic.



Actual colors may vary depending on printing or screen variations. We recommend looking at a physical sample for the most accurate color representation.

Apex PLUS

BETTER PERFORMING, BETTER LOOKING COMPOSITE

Apex PLUS takes the benefits of Apex composite to the next level. It offers the natural look of Apex in cutting-edge composite technology. Its improved bamboo foamed-PVC and glass fiber-reinforced core creates a more durable and versatile board with increased span capabilities and greater stability. This eco-friendly and slip-resistant composite is low maintenance and faces Mother Nature's toughest conditions with reliable long-term performance and timeless style.

FEATURED: Apex PLUS - Brazilian Teak

REINFORCED, CAPPED BAMBOO-PVC COMPOSITE

Apex PLUS offers you a resilient and natural-looking composite. Its bamboo foamed-PVC and glass fiber-reinforced core allows for increased span capability over Apex. Low-maintenance Apex PLUS is more stable with less expansion and contraction than its predecessor and requires only basic cleaning for optimal longevity. Its protective cap is made from a resilient acrylic polymer coating for long-term fade, scratch, and stain resistance. Apex PLUS also provides decay resistance against insects, moisture, and the elements. Apex PLUS is an eco-friendly alternative to timber that prevents deforestation and premature deck replacement and uses solar power within the manufacturing process.

APEX PLUS DECKING PROFILE TYPES

Apex PLUS is available in two profile designs to let you build your dream outdoor space. Both profiles offer the renowned Apex color technology and composition with the state-of-the-art Apex PLUS reinforced core. Grooved boards and starter boards offer the complete solution for any outdoor decking project. Starter boards are specifically designed for creating perfect picture frames, and classy deck and stair edges. Create an uninterrupted installation with Chain collated decking clips and color matching composite decking screws by HULK fasteners.

Cross section	Description	Dimensions	Lengths	Joist spacing	Fasteners

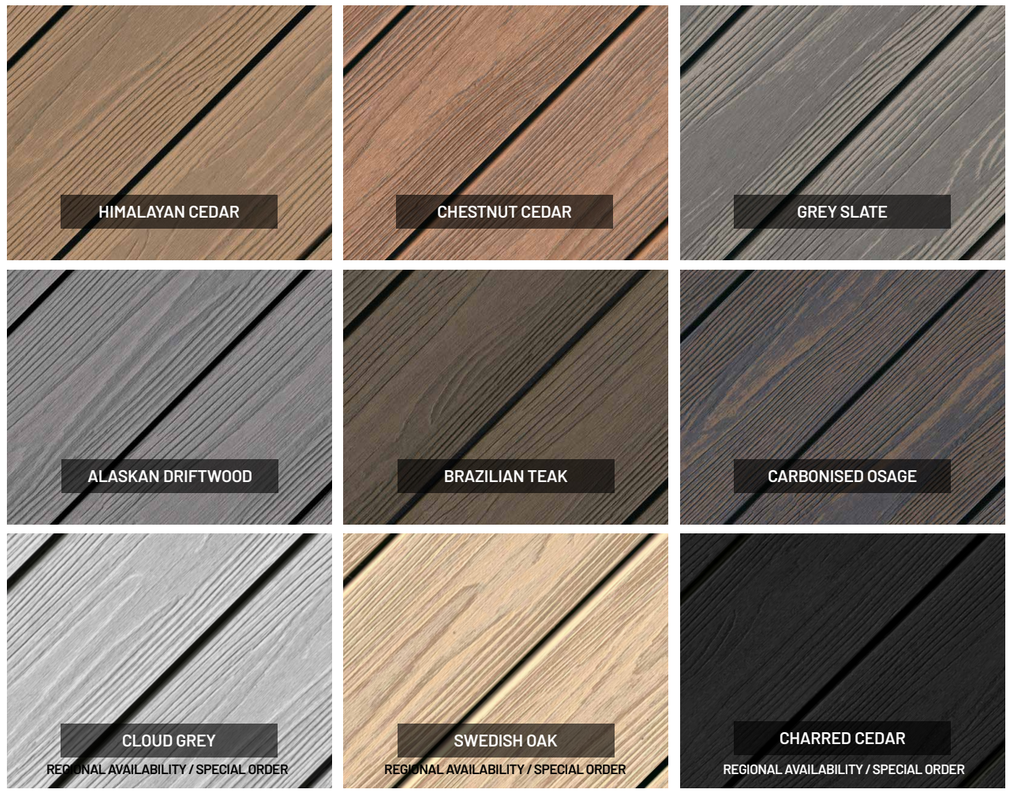
COLOR RANGE

Apex PLUS dual color range adds an additional layer of color to each board to further enhance its natural look. The variance in shades within a single composite profile beautifully showcases the color tones found in timber making your composite all the more striking. Dual tone colors are ideal for mid-to-large-scale composite decks and projects or other areas that are all about that natural look.



Actual colors may vary depending on printing or screen variations. We recommend looking at a physical sample for the most accurate color representation.

FEATURED: Apex PLUS - Carbonised Osage

FEATURED: Apex PLUS - Brazilian Teak

WIDE DECKING FOR DOCKS, PIERS, & MORE

Pioneer, Apex PLUS, and Infinity IS all offer a wide decking board option. With Pioneer and Apex PLUS glass-fiber reinforced PVC core able to span up to 24" on center. Replace the never-ending upkeep of traditional docks and piers with a sustainable, stronger, and significantly lower maintenance option. Enjoy longer-lasting docks or piers that are impervious to water absorption and barefoot-friendly.

Better Aesthetics. More Savings.

Using 7" or 8" deck boards instead of traditional 6" boards offers a sleeker, more modern aesthetic with fewer visible seams and a cleaner overall look. The wider boards cover more surface area, leading to reduced material and lower installation costs. Eva-Last offers wide boards in all three deck profiles.

Infinity

ULTIMATE PEACE OF MIND

Infinity bamboo composite is the ultimate in durability and one of the toughest co-extruded composite decking ranges available. Its resilient protective cap made of an advanced polymer resists scratches, fade, mold, and mildew, and makes Infinity exceptionally low-maintenance, with only the most basic cleaning required for optimal longevity. Infinity offers decay and weather resistance with top protection from insects and harsh weather. Its streaked color variation provides a natural look that embodies the essence of timber. Enjoy the stain and slip resistance of this environmentally friendly alternative to timber that is holistically sustainable from its manufacturing to its use of raw material.

DISCOVER EVA-LAST MATCHING BUILDING SYSTEMS

Innovative Eva-Last building systems offer the convenience and longevity of low-maintenance bamboo composite in advanced cladding, screening and fencing. Explore and enjoy an inspiring and naturally beautiful range of decay resistant outdoor building product solutions.

VistaClad
Cladding inspired by nature

ADVANCED BAMBOO COMPOSITE CLADDING

VistaClad bamboo composite cladding breathes vibrancy into your home or outdoor space and enhances your walls with the attractive look of hardwoods.

EVOLVER
THE EVOLUTION OF FENCING

ALUMINUM FRAMED HORIZONTAL COMPOSITE FENCING

The Evolver system allows for complete customization by pairing optimized aluminum posts and framing with environmentally friendly bamboo composite for a durable, low-maintenance, modern-looking, and corrosion resistant fence.

OASIS
CAREFREE COMPOSITE FENCING

BAMBOO COMPOSITE FENCING

Unlike traditional wood fencing, Oasis requires virtually no maintenance to continue to look as beautiful as it did the first day it was installed. This means no staining, painting, or replacing boards.

RENEWABLE RESOURCES & RENEWABLE ENERGY

We believe that how we manufacture is just as important as what we manufacture when it comes to going green. That's why we've traded in fossil fuels for renewable energy. Our products use solar power as part of our manufacturing process. We are fully committed to bringing you a product that's holistically eco-conscious.

Every Eva-Last range pairs recycled raw ingredients with bamboo for a stronger, more sustainable composite. Bamboo rejuvenates over 30 times faster than traditional hardwoods and it releases 35% more oxygen into our air. Eva-Last is internationally recognized for our commitment to the environment. We're proud of the work we do to promote environmental sustainability, and invite you to choose timber alternatives that are gentle on the Earth.

- *Made from recycled materials*
- *No trees felled*
- *No treatment or toxic chemicals required for maintenance*
- *Solar power used in the manufacturing process*
- *Reduced impact on landfills*
- *Reduced carbon footprint*
