BAD DOG ROVER BITS™

BAD DOG ROVER BITS are covered by a Lifetime Satisfaction Guarantee.

WE WILL REPAIR OR REPLACE ANY ROVER BIT THAT BECOMES DULL OR DAMAGED.

Return the bit(s) along with $5 USD per ROVER BIT for shipping and handling.
Please note: Weight constraints limit replacement of ROVER BITS to mail only.
Sorry, they cannot be replaced at trade shows.

WHAT'S EVERYBODY BARKING ABOUT?

From the chip-resistant carbide edge to the slim 6" shank for better maneuverability and greater depth of cut, ROVER BITS were made for working with wood and *more*! With all the "best" qualities of a forstner bit, an auger bit, and a spade bit in one bit, a set of ROVER BITS is an asset for any tool box.

ROVER BITS do not rip up material, leaving a cleaner hole than the typical bit to save you finish time. ROVER BITS work equally as well in softwood or hardwood like oak, rosewood, or walnut. How you use ROVER BITS is limited only by your imagination. Let these drilling tips guide you.

THEY'RE MADE FOR WOOD, PLASTIC, CARBON FIBER AND EVEN MORE!

ROUND HOLES:
Use like a traditional wood bit at any speed up to 2,500. Where there is a possibility of hitting a nail, increase dripping speed to 2,500 rpm.

QUICK MORTISE™:
Install lock sets in record time with no secondary operations. Simply drill a series of overlapping holes to desired width and connect by side cutting with Rover Bits. Drill at any speed. Sidecuts at 2,000 rpm.

POCKET HOLES:
The strongest kind of screw joint. Use for building furniture, railing, and other wood projects. Also great for keyholes.

CARVING:
Use Rover Bits for rough wood carving or to hog out material for insets.

ROVING™:
Cut through material at seemingly impossible angles. Makes running wires or piping a snap. Use Rover Bits to make grooves for installation of wiring under flooring.

ALWAYS WEAR SAFETY GLASSES!
ROVER BITS ARE SHARP!
ALWAYS DRILL AWAY FROM YOU!

SPECIFICATIONS

POWER SOURCE	1/2" or 3/8" Electric Hand Drill
SHANK	Hex end for non-slip drilling
MIN. SPEED	400 rpm (lower speed allows for more control)
MAX. SPEED	2,500 rpm

RECOMMENDED DRILLING SPEED

	Min. Speed	Max. Speed
Wood Composites	400 rpm	2,500 rpm
Particle Board	400 rpm	1,500 rpm
Carbon Fiber	400 rpm	1,000 rpm
Fiber Glass	400 rpm	1,500 rpm
Solid Surface Materials	800 rpm	1,000 rpm
Thin Sheet Aluminum	1,800 rpm	2,000 rpm
