Royal Plywood Co. | FORMICA

FORMICA CORPORATION IN PARTNERSHIP WITH ROYAL PLYWOOD CO.

It wasn't always this way, but since its founding in 2015, the partnership between Formica and Royal Plywood Co. has established itself as the top choice for laminate and lamination in the Western United States. If you haven't already, please consider the following...

Design Excellence

Formica Laminate is undoubtedly the most complete and visually attractive collection to date, surpassing all other non-niche collections. Compare our Formica wallboard with others in our class, either in person or online, and the superiority is clear. Our product collection offers an unparalleled range in "best in class" across numerous categories and product lines, including:

- 20 textures available in Solids, Woodgrains, and Patterns
- 180 FX large-scale designs
- ColorCore 2, DecoMetals, Compact Laminate, Trespa including lab surfaces
- Hardstop Laminate for high impact and wear areas
- Markerboard
- FENIX - Noted for its superior low-light reflection and anti-fingerprint characteristics
- Our new Arpa "Touch of Wood Collection"

Unmatched Accessibility

The partnership between Royal Plywood and Formica Corporation ensures that Formica commodity products are the most competitively priced and accessible domestic laminate in the West. This, combined with the product's availability, makes Formica your go-to laminate. Additionally, with Formica's West Coast warehouse just hours away in Bakersfield, CA, and Royal Plywood's stocking over $5,000,000 in inventory, we ensure a steady supply chain between our four facilities in Cerritos, Sacramento, Las Vegas, and Chandler, AZ.

Comprehensive Lamination Solutions

Royal Plywood provides a complete lamination service with Formica as our "Crown Jewel". We offer the widest availability of cores in North America in terms of products, thicknesses, and dimensions.

Our lamination equipment, are all domestically manufactured by Black Bros Industries in Mendota, IL, includes 8 air pod presses across 3 locations, capable of pressing products from 30 inches wide to 5 feet wide and up to 12 feet long.

Calibrated glue spreaders and panel scrubbers ensure top-quality production, which is difficult to find anywhere else.

Our Promise

Our guiding principle is: "We don't aim to make the most laminated panels; we aim to make the best. All our success starts from this philosophy." **- Dana Linz, President, Royal Plywood Co.**
