*All Hörmann locations strive to stock **white short raised (traditional), white long raised (ranch) and white country** panel designs in the most popular sizes to support our Builder Product lines with industry-leading lead times. The optional panel designs and optional colors are available but will be subjected to options pricing, minimum order quantities and extended lead-times as they are not typical stock items across all Hörmann locations. If you have a project requiring these options, please speak with your representative(s) for details on how we can support your efforts.

Residential Garage Door Operator
US LISTED 1LD2

HomeLink®
COMPATIBLE

All SilentDrive® openers are built with a DC motor and come with a belt drive system. The DC motor and Belt Drive System make for very quiet operation, dramatically enhancing your total quality experience.

The dual bulb and lens covers diffuse the lighting in your garage while you enter or exit your garage. A three minute auto delay shuts your lights off automatically for your convenience.

Deluxe Wall Console Station

Operates the door from inside your garage and independently operates opener lights. A separate lock button eliminates the need to unplug the operator during extended absences.

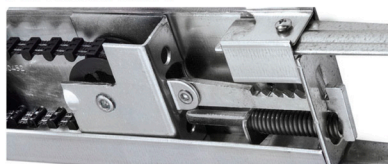

Mini transmitter

The conveniently sized transmitter allows you to control up to four separate doors.

Hörmann Innovations

Belt Tension Guard

Hörmann SilentDrive® garage door openers come with the unique Beltension Guard™ built into the opener rail, to maintain proper belt tension for the life of the opener.

Aramid Fiber Reinforced Belt

Hörmann's unique aramid fiber reinforced belt will not rust, limits wear & tear, resists moisture and never needs lubrication. This special belt system provides a quiet ride and many years of worry free operation.

EngageLock™

Hörmann SilentDrive® garage door openers are equipped with the unique EngageLock™ built into the opener rail. It eliminates door back drive action in the event of a power loss, securing your home and property.
