

Red Devil

PAINTABLE SILICONE

HYBRID SEALANT

Red Devil® Paintable Silicone, a premium hybrid sealant, is formulated to provide the same exceptional performance from a silicone sealant while also offering unrivaled paintability. This 100% waterproof sealant prevents mold and mildew when cured and has the permanent flexibility to withstand active joint movement and bonds to almost any surface. It can be applied to wet or dry surfaces and is paint and rain-ready within 30 minutes.

EXTERIOR APPLICATION

Our sealant offers the flexibility and durability of silicone sealant with the added benefit of paintability from an acrylic sealant, ensuring a long-lasting performance. Formulated for both residential and commercial applications, it is excellent for sealing gaps and joints around window and door frames. It effectively prevents water damage and air infiltration, providing a seamless finish that can be painted to blend with surrounding trim and siding. It is also effective in construction flashing projects, providing a watertight seal that protects critical areas of a building where different materials meet.

INTERIOR APPLICATION

Ideal for household repairs, this product's key feature is its paintability, which ensures an aesthetic appeal that blends with the surrounding decor. It effectively seals gaps and joints around baseboards, crown moldings, and other trim delivering a smooth polished finish. Paintable Silicone can also be used for sealing in high-moisture areas, like kitchens and bathrooms prevent mold and mildew growth once cured.

INDUSTRIAL APPLICATIONS

Paintable Silicone widely used in numerous industrial applications due to its durability, flexibility and resistance to weathering and extreme temperatures. Its paintability also allows for easy color matching which is crucial for maintaining visual consistency. Commonly used in weatherproofing exterior facades and cladding systems to seal around pipes, vents, ductwork, electrical outlets and HVAC units to prevent air leaks.
