

The Ultimate ERP for Smart Builders.

Introducing NX™, the next-generation ERP platform for the modern homebuilder. NX is an all-in-one operations, sales and finance software solution to power your entire homebuilding enterprise.

Scale Seamlessly as Your Business Grows

From emerging builders to established leaders, NX's scalable design adapts to your company's needs, evolving alongside your growth without missing a beat.

Stay On Course with Real-Time Data and Advanced Auditability

Make confident decisions with NX's robust data tracking and audit features, giving you a clear, real-time view of project progress and financials to keep everything on course.

Customize to Fit Every Aspect of Your Unique Operations

Tailor NX to match the specific needs of your business with extensive customization options, from user permissions to workflows, ensuring a perfect match with your processes.

The Freedom to Integrate

Say hello to modern APIs. With NX, you'll have countless opportunities to integrate with the most up-to-date app, and without needing system-level configurations.

Delight and Empower Your Team with an Intuitive, Modern Interface

NX is easy to learn and use. It's modern and user-friendly design boosts productivity and simplifies data management, enabling quick adoption and seamless integration.

24/7 Support from Setup to Success

Experience peace of mind with dedicated support from implementation to daily use. With the deepest industry and technical knowledge, our team is ready to tackle your biggest challenges.

Mobile-Ready and Cloud-Based for Anytime, Anywhere Access

Manage projects on the go with NX's mobile app and cloud compatibility. Access crucial information anytime, anywhere, and keep your team connected from the office to the field.

"When it comes to homebuilder ERP systems, NX is a big leap forward!"

— C.W., VP Operations | Large US homebuilder

Powerful Modules to Support Your Entire Homebuilding Business

> Land Management

Plan, schedule, track, report, and manage single-phase and multi-phase communities. Enabling seamless interaction of team members from land managers to accountants, to manage all aspects of the development, you'll use NX's intuitive and powerful processes to create memorable homebuyer experiences while maintaining an eye on the long-term bottom line.

> Sales & Design

NX Sales & Design's digital interface simplifies the home sales journey in a one-stop-shop seamless solution. From customized home quotes, inventory management, home curation, customer reservations to easy option selections, NX enables the creation of customized contract packages/addendums and the collection of electronic signatures—all within a single platform.

> Accounting & Finance

Streamline construction accounting, make informed decisions instantly, and reduce costly errors across your organization with NX, featuring advanced auditability and tailored to your unique operations.

> Property Management

Simplify operations for property managers and enhance the rental experience for tenants, with a multifunctional online solution, for everything from applications to move-ins, rent billing, and regulatory compliance.

> Purchasing & Estimating

Manage building costs and enhance business predictability with NX's comprehensive estimating and purchasing capabilities, fueled by real-time data.

> Business Intelligence & Reporting

With powerful reporting and data integrations, gain critical insights on homebuilder operations, finance and sales through easy-to-understand reporting, analytics, dashboards and benchmarks.

> Scheduling & Service Management

Easily view and manage schedules, payments, and service requests from the office or job site with NX's powerful, mobile-ready scheduling technology—keeping your projects on track and under control.

> Competitive Benchmarking

Gain critical insights that give you a competitive edge by comparing your data to regional and national homebuilders, powering quicker, smarter business decisions.
