Savaria® Vuelifit® panoramic glass  
elevator and hoistway for new and  
existing residences

# vuelift

## Break with tradition

Put aside your pre-conceptions about home elevators. No closed hoistway. No box-like shape. Break convention and meet Savaria® Vuelift®.

With its crystal clear cab and integrated hoistway, the Savaria Vuelift is at home in virtually any design style. Choose the graceful cylindrical or prismatic octagonal shape to provide convenience, luxury and accessibility for all levels of your home. Glass Vuelift models are crafted from optically clear low-iron silica glass for ultimate clarity with no green hue. Acrylic Vuelift models are built with premium UV-resistant clear acrylic panels – which far exceed code requirements for strength and won't discolor over time. The effect is a spacious-feeling cab that provides a comfortable, airy ride with spectacular vistas.

Savaria Vuelift is designed and built with care using the finest materials and reliable components to meet or exceed the strictest safety guidelines. Driven by an energy-efficient winding drum drive train system using two aircraft cables, you experience a smooth, stable and quiet ride. The self-supporting hoistway means major modifications to the home are typically not required; most of the weight is transmitted through the steel frame structure to the lowest floor level.

## Design in ways that are **inconceivable** with any other home elevator

### Balcony attachment

Vuelift can be installed to travel to balcony or mezzanine areas of your home, creating unique panoramic views of your home as you ride.

### Inside a staircase

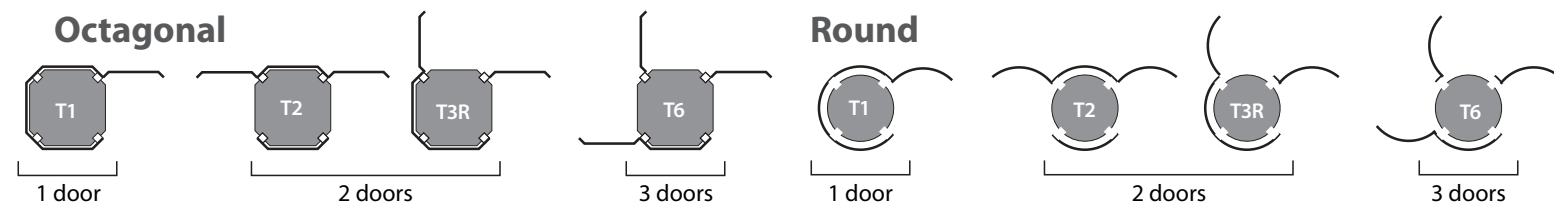

When installed with stairs that wraparound the elevator, Vuelift saves space and creates a beautifully compact footprint.

### Through-the-floor

With its integrated hoistway, Vuelift can be installed through open spaces giving you almost unlimited options for floorplan placement.

The Savaria® Vuelift® is available in 5 models: round acrylic, round+ glass, octagonal acrylic, octagonal glass and octagonal+ glass. Automatic bifolding doors, interior LED lighting, ventilation fan and illuminated operating buttons are included. Standard safety features include emergency battery back-up lowering, overspeed and safety brake system and door interlocks. Configure Vuelift with a single door or multiple doors to suit your application needs. You will find model comparison information, full specifications, a planning guide and our inspiration guide all at [Vuelift.com](http://Vuelift.com).

## **cab types**

**The Savaria® Vuelift®** is framed with standard black sandtex powder coat, with optional white, silver or custom colors available. The interior cab size varies by model and Octagonal+ glass offers a clear cab gate opening of up to 33" to accommodate a mobility device. Regardless of model, the 360 views deliver a spacious feel inside the cab. Simplified specifications are provided below, with complete information available at [Vuelift.com](http://Vuelift.com).
