### OPENING NEW HORIZONS

+70.000

Optimedia has been producing PVC and Aluminum joineries since 1994, amassing an impressive and modern production system. Since 2006, we have started exporting our products currently having more than 2.500 B2B partners worldwide.

#### OUR VISION:

To be a leader in the production of PVC and Aluminum joineries, offering support to all our partners. To achieve this, we have kept to our core principles, maintaining the quality of our products and the relationships with our partners as top priorities.

#### OUR MISSION:

To produce windows and doors that have certified and proven characteristics, manufactured and delivered to the highest market standards.

SUPPLIERS

GUARDIAN GLASS is one of the largest and most innovative glass manufacturers in the world. Founded in 1932 in Detroit, Michigan, the company operates on five continents, serving more than 160 countries.

guardianglass.com

SAINT-GOBAIN GLASS is the european leader in the production of construction glass. The factory in Călărași, Romania, has the most modern float glass production line in Europe. The thermal, acoustic and security performances of SAINT-GOBAIN glazings recommends them for the most creative and original architectural solutions.

## **OptiPro** Triple Gasket Window

PRODUCT GEOMETRY

Frame depth: **3** ½ in Sash depth: **3** ½ in

IGU OPTIONS

**Double/Triple-Pane** maximum IGU thickness: 2 % in

THERMAL PERFORMANCE

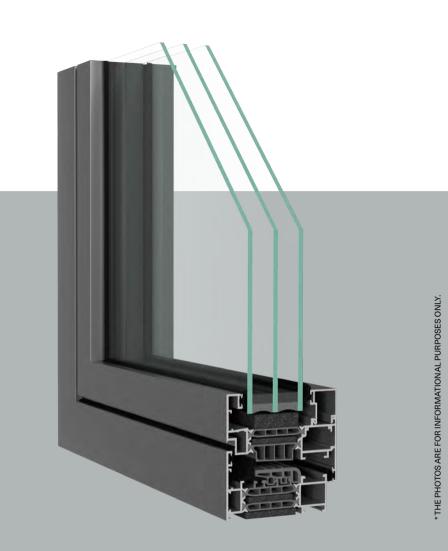

U<sub>factor</sub> ≥ 0,13 Btu/h·ft<sup>2</sup>·F

#### MAX. ACOUSTIC PERFORMANCE

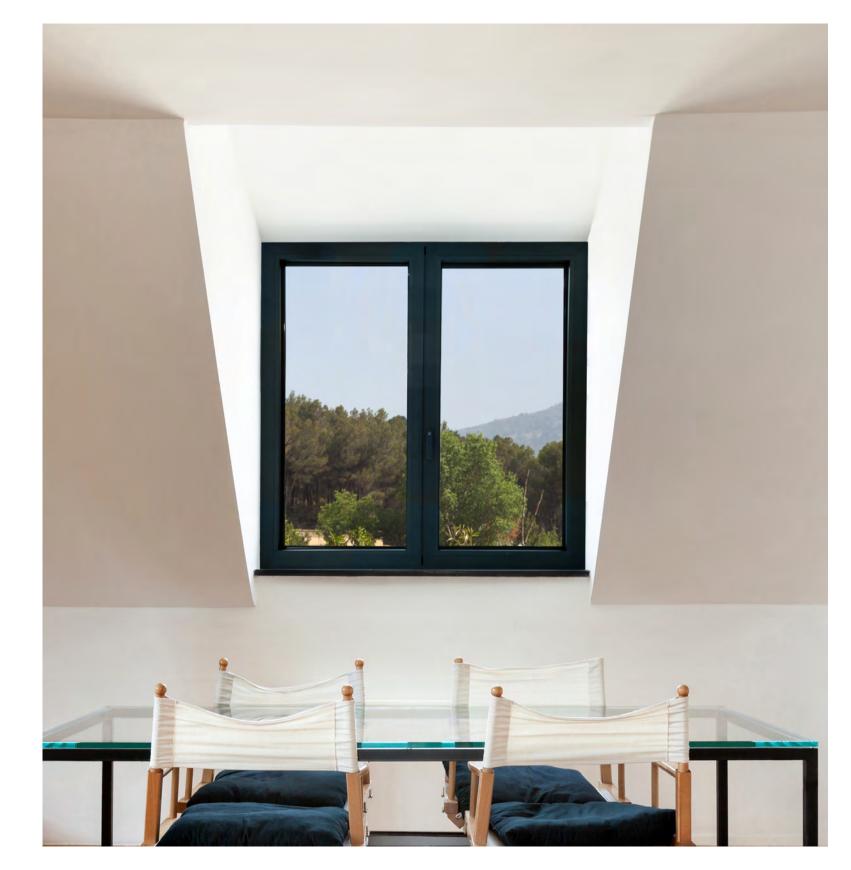

**46** dB

OPENING STYLES

Tilt & Turn Casement Hopper / Awning Fixed

OptiPro is an innovative system offering superior sealing, excellent energy efficiency and outstanding acoustic insulation. Adaptable to extreme conditions and with a reduced frame depth, it is perfectly suited for passive houses and provides maximum comfort. Its outstanding performance in AWS tests and easy assembly make it an ideal option for large-scale production. With a hidden hinge design option and highly secure hardware, it brings light and security to any space.

**43** dB

OPENING STYLES

**Multi-Slide Patio Door** 

The new OptiPro lift & slide system is designed to cover large openings while providing outstanding thermal insulation. With over 3 inches thick sashes and advanced polyamides, it achieves an impressive U factor value of just 0,11 Btu/h·ft²·F, ranking among the top-performing sliding systems in thermal efficiency. Additionally, the perimeter interlock profile is reduced to under 5 inches, maximizing the glazed surface whilst promoting the incidence of natural light within the interior of the premise.

Make a bold statement with our customizable pull bar designs, featuring clean lines, industrial aesthetics, or decorative details. Choose from single- or dual-mount configurations, with options like integrated LED lighting for dramatic effect and oversized designs for grand entryways.

#### **CONFIGURATION OPTIONS**

#### **Dimensions**

Standard dimensions are from 21 5% in to 74 34 in; On request, some pull bars can be made to custom dimensions.

#### Colors

The standard colors are stainless steel and black. For pull bars with integrated decor, wood options are available (walnut, golden oak, or dark oak), as well as glass inserts.

#### **Smart configuration**

Any style can be paired with a smart fingerprint locking system, integrated directly into the pull bar or on the side wall.

## Hardware and Handles

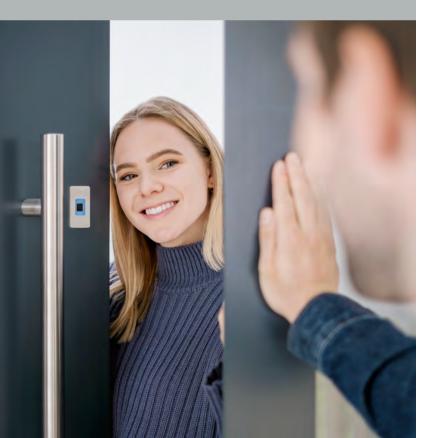

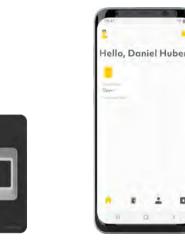

## Accessories

### cekey

Give your front door a smart upgrade. The latest generation of fingerprint scanners offers more than just a secure entry. Packed with intelligent features, it redefines convenience. Unlock your door effortlessly and safely with your fingerprint while enjoying enhanced functionality in everyday life. The sleek, modern access control system seamlessly integrates into your door, meeting the needs of today, tomorrow and the future.

#### **ADVANTAGES**

The system upgrades your front door with a built-in fingerprint scanner, already integrated in our factory.

Setup is quick via the ekey bionyx app.

All basic functions are available in Local mode without an Internet connection.

Plus mode offers remote opening and push notifications, (requires Internet and registration).

The ekey bionyx app is intuitive and simplifies user and system management-no manual required.

## **Smart keys**

Together with our top supplier, we are proud to present an electronic locking system that offers enhanced flexibility, complete control and a comprehensive overview of your entire locking setup. Compared to traditional mechanical locking systems, the smart keys developed by WinkHaus excel in their user-friendly design, robust security, and long-term cost savings.

#### **APPLICATIONS:**

Homes: blueCompact is perfect for smart homes and residential buildings;

**Businesses:** blueSmart is an ideal solution for growing businesses or commercial buildings; The system supports the integration of hundreds of cylinders and keys, providing scalability and efficiency.

Masterkey

Cylinder

Keys, available in 5 colours

**ADVANTAGES** 

Convenience Easily manage your entire locking system with an app

Flexibility Grant acces or block lost keys at the flick of a switch

More control All access events can be closely monitored

**Remote access** Locking authorisations can be issued remotely

Security Data is only stored on the masterkey

Practicality Easy installation and flexible expansion

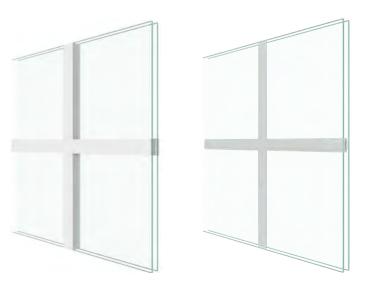

Glass represents approximately 80% of a joinery's surface. Optimedia equips its products with Saint Gobain Glass or Guardian glazings that meet thermal, acoustic and security requirements, whilst ensuring the desired indoor ambiance. Their winter-summer comfort function maintains a pleasant interior atmosphere throughout the year, with the sheen of their coating giving the space a touch of elegance.

#### CONFIGURATION OPTIONS

For design purposes or to protect you from prying eyes, Optimedia offers you a wide range of decorative glass with a large number of models, textures and colors.

Also, for added style and elegance, you can choose between georgian and astragal bars. These can be of different sizes, colors and shapes, made of PVC or Aluminum.

Astragal Bars 1" x %" or 1 %" x %"

Georgian Bars 3/4" x 1/4" or 1" x 1/4"

# **Tempered glass: Optimedia ESG**

ESG is a type of glass that, following the tempering process, shows a considerably higher resistance to mechanical and thermal stresses compared to ordinary glass (including laminated glass). In case of breakage, ESG glass fragments into small pieces with blunt edges. Its superior mechanical properties recommend it for large glazed elements.

#### USES:

Architectural: all types of interior or exterior windows, doors and glass assemblies, consisting of independent or linked elements, facades, glazed roofs, stairs and even glass floors;

Urban furniture: telephone booths, public transport stations, parapets;

Interior furniture: table tops, shower cabins, shelves, furniture.

Glass

#### WHY ESG (TEMPERED) GLASS?

ESG glass is 50% lighter than laminated glass, thus facilitating its transport and assembly whilst at the same time extending the joinery's life by reducing the load on the hardware.

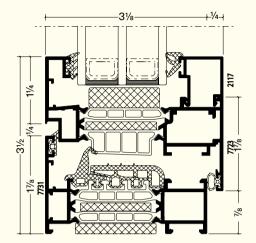

It is 5 times more resistant to tension, shocks and bending stresses compared to an ordinary or laminated glass of the same thickness.

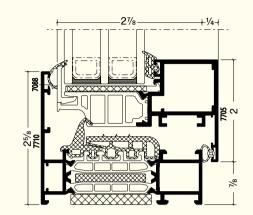

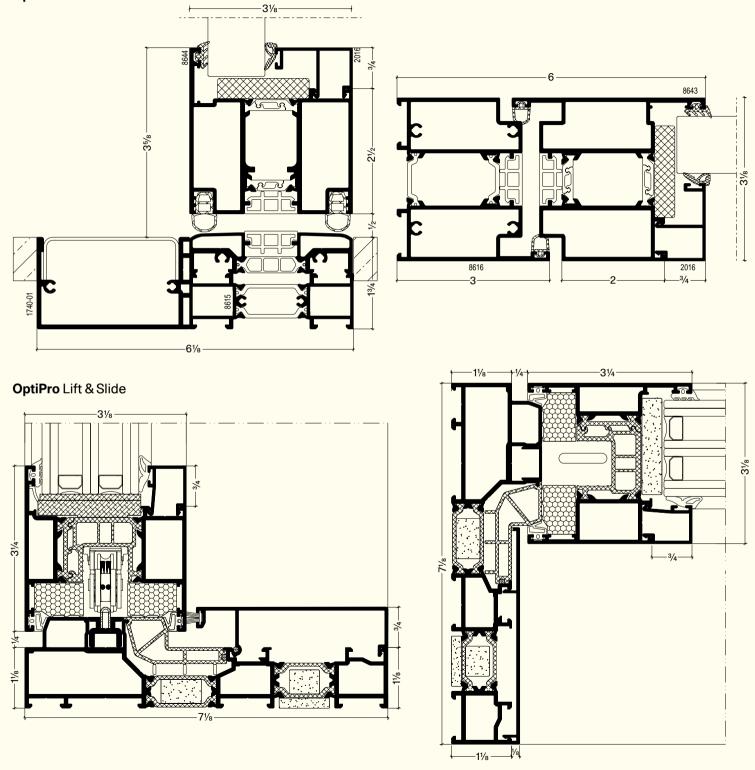

It reduces the risk of injury in case of breakage, by fragmenting into small, blunt pieces and limits the risk of break-ins.
