THE WAIT IS OVER

Zonda Enterprise with Build-to-Rent

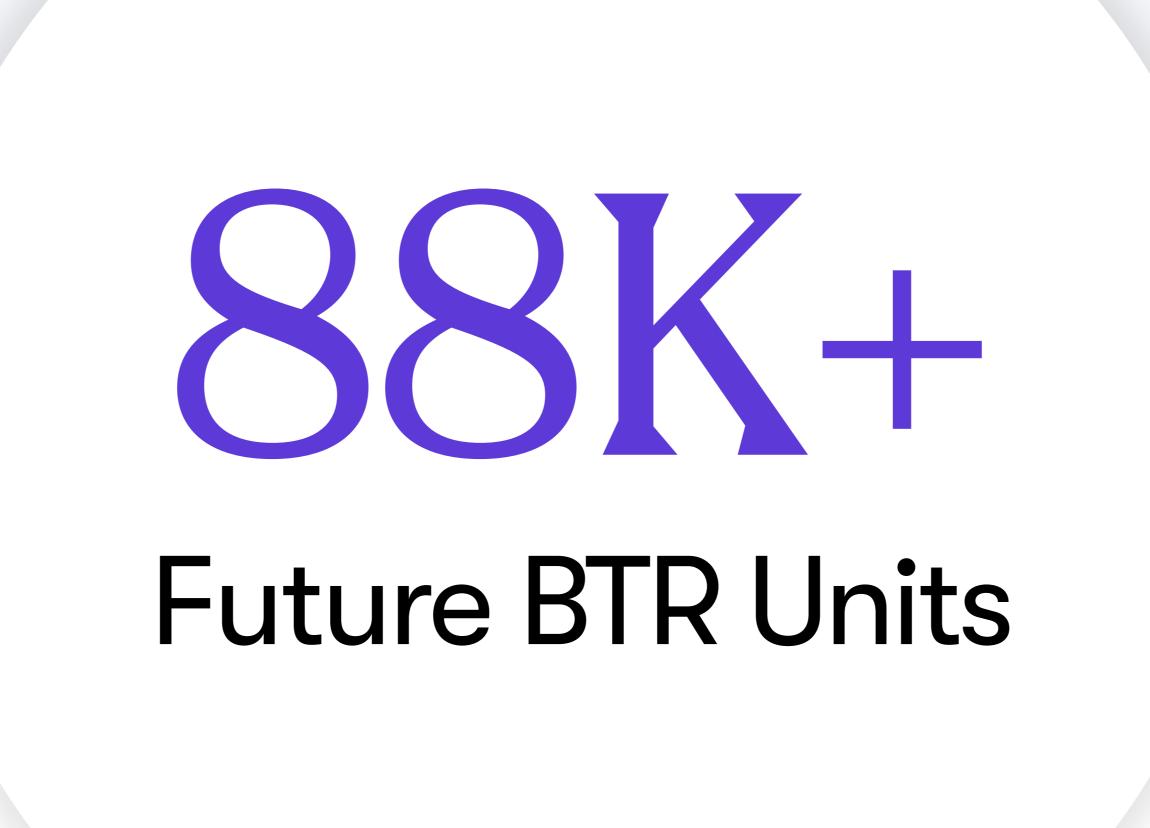

Gain complete clarity of the build-to-rent landscape

Zonda's most complete housing data solution, Enterprise, now offers an unmatched view into the build-to-rent market.

Leveraging Zonda's up-to-date proprietary census data, along with satellite imagery, Enterprise with Build-to-Rent is the most comprehensive solution for builders, operators, and investors in the build-to-rent space.

Experience the difference

Tailored filters & geography

Easily filter projects by product style, marketing status, unit size, rent rates, and more to tailor your analysis around projects best suited for your initiatives. Leverage Zonda Enterprise's flexible geography tool to narrow down projects by state, CBSA, county, or even by drawing a custom shape on the map.

Up-to-date Census Data

Zonda's proprietary census of rental housing data is unmatched in detail and updated quarterly, providing clients with the most complete and accurate view of the build-to-rent landscape. The data goes beyond standard project rankings allowing analyst to dig deeper and identify important trends faster than ever before.

Unmatched project details

Dive deeper into specific projects with comprehensive project profile pages providing insights into unit counts, construction status, pricing, amenities, unit features, floor plans, school assignments and more. Easily export details for multiple targeted projects in multiple formats to share out to your team and stakeholders.
