

# QUALITY. CONFIDENCE. CARRIER.

Put your customers at ease  
with Carrier comfort systems

## WHAT YOU CAN EXPECT WITH CARRIER

Innovation, quality, stability: Carrier comfort products and systems represent the leading technologies, environmental sensitivities and lasting durability that have endured since the very first Carrier system was invented back in 1902.

Today, as you consider your options for HVAC, you can count on Carrier to deliver well-designed, tested and polished products homeowners can appreciate. In Carrier, you have a partner that is motivated to continue building on its legacy of creating innovative, comfortable, healthy, secure indoor living environments. We provide you peace of mind when you build with Carrier comfort systems.

## ENHANCED COMFORT

Innovation, efficiency, quality: Carrier heating and cooling products represent years of research and are designed with one goal in mind – making homes comfortable. Carrier products deliver year-round satisfaction with built-in quality, environmental stewardship and lasting durability all backed by the indoor comfort experts.

Systems Only

## ENHANCED CONTROL

An ecobee for Carrier smart thermostat offers the same excellent user experience as all ecobee thermostats. The ecobee3 lite smart thermostat helps homeowners keep their hard-earned money through smart energy use. Features like smart recovery monitors conditions to learn the best way to bring the home to its scheduled temperature. Comfort schedules allows homeowners to set schedules to enjoy comfort when they are home, and help with energy savings while they are away. And, it's all available with remote operation through an Internet-connected device.

The Carrier Smart Thermostat has a clean, contemporary design which fits seamlessly with any home décor. With a simple touch, it clearly displays system mode, current temperature, fan mode setting, and set-point temperature. You can connect to this Wi-Fi®-connected thermostat using the Carrier SmartHome app to create customized comfort schedules to match your lifestyle. Set the temperature for savings while you are asleep, or away, or comfort when you are awake and at home.

No matter which models appeal to you and your customers, proper installation and routine maintenance by a qualified and professional Carrier dealer will provide years of indoor comfort, backed by the best name in the business. For more information about our products and how to include them in your homes, please visit [carrier.com/residential/en/us/builder/](http://carrier.com/residential/en/us/builder/).
