DIRECT GLAZE SIDELITE ADAPTER

The more outdoor light you can let into a home, the more inviting it becomes. This is as true for a home's entrance as any other room. The **Direct Glaze Sidelite Adapter** for The iXo Sill can help bring the light in.

The **Direct Glaze Sidelite Adapter** can provide your exterior doors with custom glass glazing options, paired with minimum framing details to create the perfect complement to today's modern entry door aesthetics. All components, including height adjusting shims and a low profile glass stop, are available in Chocolate and Black to coordinate with the color palette of the door's trim and hardware.

Direct Glaze Adapter

Direct Glaze Adapter with 1/8" Shim

Direct Glaze Adapter with 3/8" Shim

CUSTOM HEIGHT ADJUSTMENT

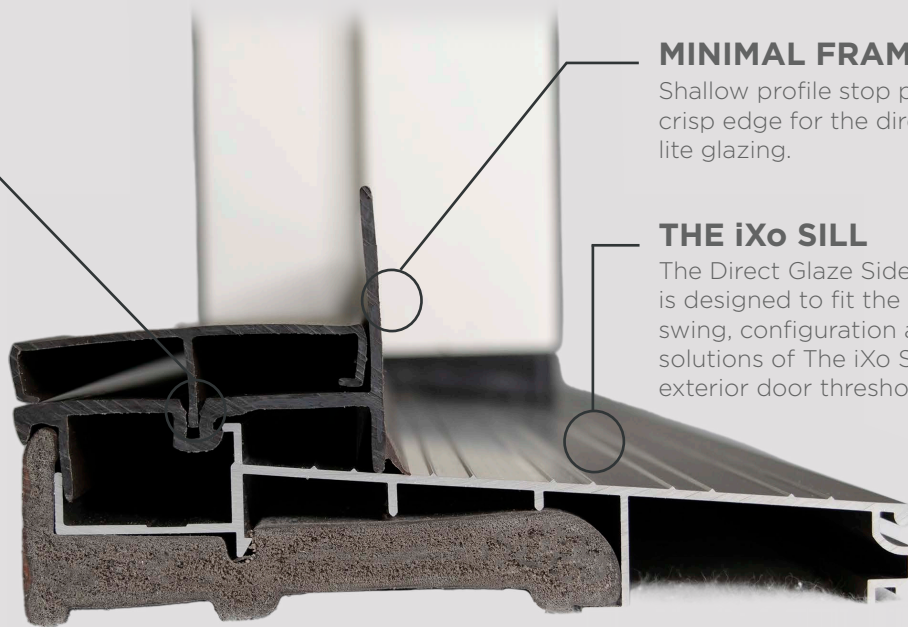

The Direct Glaze Sidelite Adapter is designed to support glass lite glazing, with two optional, height-adjusting shim components for custom sizing needs.

MINIMAL FRAMING

Shallow profile stop provides a crisp edge for the direct glass lite glazing.

THE iXo SILL

The Direct Glaze Sidelite Adapter is designed to fit the variable-swing, configuration adaptable solutions of The iXo Sill family of exterior door threshold solutions.
