THE iXo RETROFIT SILL DECK

Before

After

ACCIDENTS HAPPEN

A dropped hammer.
An aggressive snow shovel.
A moving company in too big of a hurry with the refrigerator.

Accidents like these can leave you with a damaged sill deck detracting from the beauty of your home's entrance. As concerning as this damage might be, there's no need to tear out the entire threshold. AFCO Millwork Products has the solution.

The iXo Retrofit Sill Deck is an extruded aluminum sill deck overlay that snaps into the nosing interlock of The iXo Sill. The back edge tucks in under the flexible nose of the riser providing a clean, complete look.

COLOR CHANGE IN A SNAP

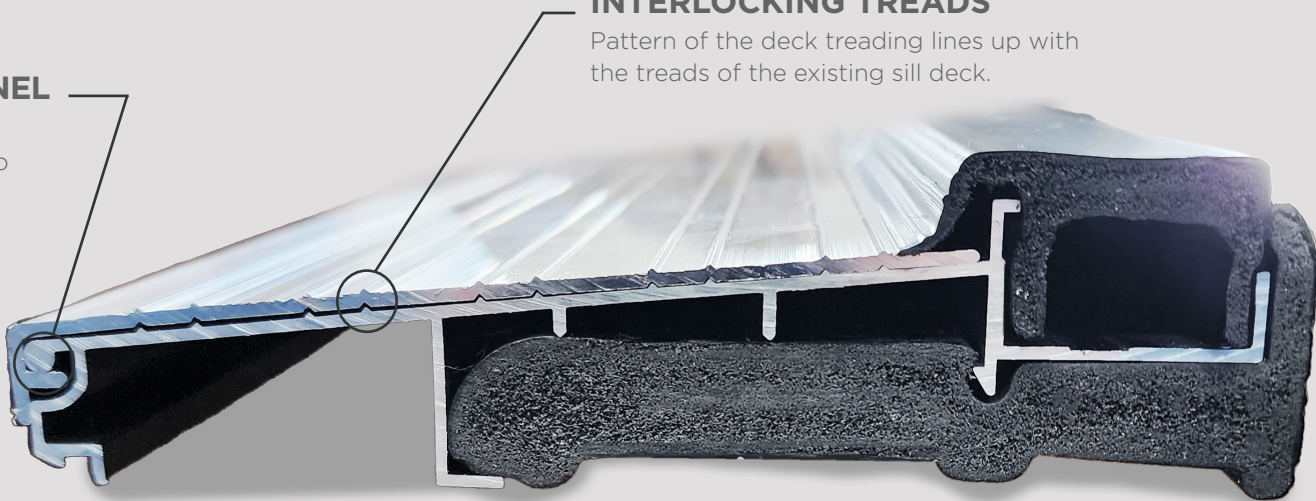

Remodeling projects bring new accent finishes. If your entrance's color scheme needs to change from a Stain Nickel to a Dark Bronze or vice versa, **The iXo Retrofit Sill Deck** can be your exterior decor solution. Your iXo Sill doesn't have to be damaged to apply the Retrofit Sill Deck for a fashionable update.

SECURE CHANNEL LOCK

Designed to snap into the nosing interlock.

INTERLOCKING TREADS

Pattern of the deck treading lines up with the treads of the existing sill deck.
