SHAKER ALUMINUM ASTRAGAL

Sometimes, what's old is new again.

Moving beyond the traditional, ogee molding style of AFCO Millwork Products' standard aluminum astragal, the **Shaker Aluminum Astragal** brings simplistic, minimal design to meet contemporary looks.

With a flat, square exterior reveal, the **Shaker Aluminum Astragal** mimics the design of today's popular flat panel door styles.

Available in all the same sizes and configurations as AFCO's standard aluminum astragal, the **Shaker Aluminum Astragal** combines the structural integrity and ease of use you've come to expect from AFCO Millwork Products with an old-world design to meet present-day aesthetics.

SHAKER ALUMINUM ASTRAGAL OPTIONS
