QUALITY THERMOPLASTIC MATERIALS

Barbour Plastics has years of experience with time tested and performance proven materials including PVC, Polycarbonate, ABS, HDPE, LDPE, PP, TPE and many more. Processing 10 million pounds of quality extrusion grade plastic materials every year provides for competitive pricing on the most popular materials in the market. Cellular Foam PVC is another offering of Barbour Plastics that is a great choice for heavy wall profiles that require thermal insulation properties or lower cost trim solutions. Available in free foam or celuka foam profiles.

THE RIGHT COLOR & APPEARANCE

Barbour Plastics stocks many house colors for many applications. If we don't have your exact shade of color, we can custom color match to your specific requirement. We can offer extrusions with a matte finish to a high gloss finish. We serve many industries from indoor retail environments to harsh exterior grade marine environments. All our standard colors are heat and light stabilized and are lead free. Metallic colors are also available where increased aesthetic value is needed.
