## Premium product

Premium product that can be used for a long time.

Tools specializing in working with gypsum boards with four different functions.

This product is a novel tool developed by a Korean carpenter with 30 years of experience.

This product is a convenient tool optimized for working with plaster boards.

Using this product allows very fast gypsum board installation, thus enhancing work perfection and work efficiency.

Professional home repair tools.

This product can be used easily by both experts and amateurs. During initial use, it may be difficult to check all of the functions. But after reading the user's manual and practicing use about 10 times as said in the manual, this will be a tool that is very convenient and helpful.

If you like this product, try giving it as a gift to friends and colleagues. They will love it.

### Precautions!

- Use Jab saw for gypsum board only, may break with wood.
- Have you ever felt that the rasp part was dangerous?  
As long as you do not touch the rasp with excessive force or intentionally with a body part, it is not dangerous at all.
- Wear work gloves for safety.
- Please make sure to keep out of the reach of the weak or elderly.
- When using Jab saw please make sure to lock for safe use.
- Handle blade safely.
- Keep out of childrens's reach.
