

TEZA 95 Series Folding Door

Explore a world of possibilities with TEZA Doors and Windows, where we don't just open doors, we create entrances to a better living. Welcome home.

TEZA's 95 Series Bifold Door, also known as a folding patio door, is designed for exterior use, providing a seamless transition between indoor and outdoor living spaces.

Product Overview

The **TEZA 95 Series Bifold Door** combines superior performance, durability, and style, making it an exceptional choice for any modern space. Featuring foam-filled profiles, this premium series provides outstanding insulation, contributing to energy efficiency and a comfortable indoor climate. Its robust design includes U.S.-made heavy-duty hardware, a secure 5-point locking system, and adjustable hinges, ensuring smooth, long-lasting operation. The door's sleek appearance is enhanced by a slim aluminum frame, customizable glass options, and integrated inside blinds. Designed to accommodate any configuration, the TEZA 95 Series is ideal for larger openings, with a **maximum panel height of 14 feet and up to 30 feet of width flexibility**. The 1-inch height bottom track ensures a seamless transition, while three weather strips per panel offer exceptional durability in harsh conditions. This series is perfect for homeowners seeking a sophisticated, heavy-duty design with superior insulation, security, and energy efficiency.

Energy Efficiency

Glass can be customized with various coatings, including Low E2, Low E4, and clear glass, to enhance privacy, protection, and thermal efficiency. These options let you choose the best fit for your needs, whether maximizing energy savings or improving comfort. The thermally broken aluminum frame adds an insulating barrier that significantly boosts energy performance, maintaining a consistent indoor temperature and reducing energy consumption. By combining customizable glass options with thermally efficient frames, our doors deliver superior performance and long-term benefits for your home or commercial space.

Performance Chart

Frame Material	Aluminum 6063-TS
Frame Thickness	1.72mm DSLS115ZB-02A
U-Factor	0.30
Argon Fill	90%
Solar Heat Gain Coefficient	0.23
Visible Transmittance	0.51
Air Leakage	0.30
Sound Performance	0.30
Wind Load Resistance	77 mph

Glass Options

-Clear Glass (1/4" - 5mm)

Clear glass offers transparency and excellent visibility, allowing natural light to flood interior spaces.

-Insulation Glass (Online) (1/4" - 5mm)

This glass integrates low emissivity (low-e) properties directly into its composition, enhancing performance and durability. It provides superior thermal insulation benefits.

-Low-E 2 Glass (Offline) (1/4" - 5mm)

TEZA's Low-E3 Glass is designed to reject solar heat while maintaining visibility and offering exceptional fading protection. It adapts to various climates and blocks 85% of harmful UV rays.

-Low-E 4 Glass (Offline) (1/4" - 5mm)

TEZA Low-E4 Glass offers enhanced light transmittance combined with superior solar control. It reflects heat back into the home in winter and blocks 90% of solar heat. It includes 20% more tint visibility than standard glass.

-Triple Panel Glass (1/4" - 5mm)

Each pane of glass is separated by an air gap, enhancing sound absorption and blocking sound transmission. This design reduces outside noise infiltration into interior spaces.

Glass Type	U-Factor How well a product prevents heat from escaping.	Solar Heat Gain Coefficient How well a product blocks heat caused by sunlight.	Visible Light Transmittance How much visible light comes through a product.	UV Protection How well a product blocks ultraviolet rays.

Finishes and Colors

Our finishes are available in standard and custom designer options, with the ability to match nearly any color. Our standard finishes include powder-coated matte black and matte white, both featuring a Class 1 coating thickness for superior smoothness and durability. Any other colors are considered custom options, featuring a high-quality paint finish that meets the AAMA-2605 rating, the highest standard for organic finishes.

95 Series Highlights

Double Pane Glass
with Argon Gas

Low-E Tempered Glass

Polyamide Spacer

High-Quality Weather Strips

5-Point Lock System

Durable Powder-Coated Finish

Heavy-Duty Hardware

Aluminum Thermal Break

The maximum limit of 6m(20ft) is to make 8 panels. The configuration is as follows:

1

2

Note: The configurations with underline "_____" are not recommended due to load-bearing and durability issues!

TEZA 95 Series Folding Door

330 Configuration - Low Track

By adding two more doors, the same configuration is as follows:

Three doors 3+0,
Five doors 5+0,
Seven doors 7+0

Inward folding
low Track

Outward folding
low Track

Outward folding
High Track

Indoor

Outdoor

Measurements and Rough Opening

TEZA products sizes its products from the frame to frame. The sizes on the invoice will be exact sizes of products. For rough opening requires 1/4" to each side (left, right and top).

Installation is the sole responsibility of the home owner, distributor user contractor, or their representative.

Notes

- For rough opening size, allow a minimum 1/4" gap between the Door and rough opening.
- All dimensions are in mm and inches.
- All dimensions are to be checked on site.
- Any discrepancy between the architectural drawing and other drawings relevant for construction should be notified before commencement.
- Sill pans are required by code for doors and windows.

TEZA's aluminum products are exceptionally recyclable. In fact, aluminum is one of the most recyclable materials on the planet, capable of being recycled repeatedly without losing its quality or integrity.
