WHO WE ARE

Homes for HOPE partners with the building industry to invest in underserved families around the world for their holistic flourishing unto the glory of God.

Nearly 700 million people worldwide live on less than \$2.15 per day. The World Bank says, "The surest way out of poverty is a good job."

For more than 25 years, Homes for HOPE has been on a mission to break the bonds of global, generational poverty through Christ-centered microenterprise development strategies. We've developed multiple ways to help the building community leverage their generosity to give talented men and women in poverty a hand up, not a handout.
