

Layer Library: All of Your Maps in One Place

No complicated GIS builds. No long timelines.

Access nearly endless data layers, or just drag-and-drop your data file to instantly visualize it on the map.

- ✓ Instant data mapping and styling
- ✓ Easy to use for your whole team
- ✓ Built in filters and search
- ✓ No GIS specialists needed
- ✓ One seamless platform

Why Acres

Finding high quality land data that's easy to understand is a challenge. That's where Acres comes in.

Built to help you understand and value land with confidence, Acres makes land research easier than ever. Access more accurate and comprehensive land intelligence, comparable sales, and easy-to-use mapping tools for fast, informed decision making.

Secure and Private

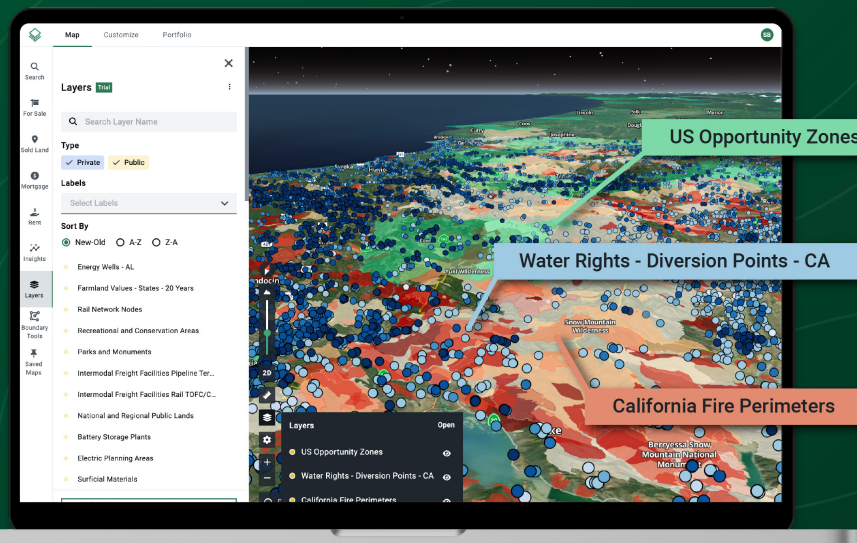

All of your data is encrypted and protected with data privacy compliance reviewed by an external third party auditor.

Maps & Data for Land People

Understand and value land with confidence.

www.acres.com

Access Nationwide Land Sales Data

Industry-Leading Database

Acres’ exclusive curated sales database is current and maintained by our in-house data science team, ensuring you have reliable and accurate data at your fingertips.

Filter and Sort

Find the most recent and relevant comparable sales in an area with filters for: price, acres, date, location, crop type, soil scores, and water districts.

Export to CSV

Save sales data with a subject property and download a comparative market analysis in an editable CSV format.

Generate PDF Reports

Generate, brand, and share eye catching reports with insights and comparable sales for a subject property.

RESEARCH ACROSS STATE LINES

Acres covers the entire contiguous U.S. — no complicated pay-per-state plans here.
