Your Projects Have Answers.

Ask Colby.

AI-powered project intelligence for ConstructionOnline.

Turn estimates, schedules, tasks, work logs, financial data and project activity into fast, useful answers - **just ask Colby.**

Ask Colby. AI-powered project intelligence for ConstructionOnline.

Meet Colby.

Colby helps construction teams get more value from the project information they already manage in ConstructionOnline. Instead of searching through individual records, reports and project screens, users can ask questions in plain language and quickly get the information they need to understand what is happening across their business.

Project Answers, On Demand

Ask about estimates, schedules, tasks, deadlines, work logs and project activity without digging through individual records.

Financial Visibility

Understand budgets, project profitability and potential cost overruns so teams can respond to financial concerns sooner.

Schedule Intelligence

Identify delayed projects, understand affected tasks and dependencies, and gain context on what may be driving schedule issues.

Portfolio-Level Insight

Look across company projects to identify trends, priorities, risks and opportunities that may be difficult to spot one project at a time.

Work Progress Tracking

Quickly understand what work has been performed, what has recently changed and what activity has been documented on the job.

Custom Reporting

Turn your data into focused reports designed around the questions, metrics and information that matter to your team.

Ask Colby. AI-powered project intelligence for ConstructionOnline.

What can you ask Colby?

Colby makes project information conversational. Builders can ask direct questions about individual jobs or their entire project portfolio and use the answers to focus attention where it matters most.

TODAY	*What needs my attention today?*	Surface overdue work, upcoming deadlines and other items that may require action.
SCHEDULE	*Which projects are falling behind schedule?*	Identify schedule concerns and get context around delays, affected work and dependencies.
FINANCIALS	*Which projects are running over budget?*	Spot projects where costs are exceeding expectations and investigate potential budget concerns.
PROFITABILITY	*How profitable are our active projects?*	Compare financial performance across jobs and identify projects that may need closer review.
PROGRESS	*What work was completed this week?*	Summarize documented job activity and quickly understand recent progress.
REPORTING	*Create a report of upcoming milestones.*	Organize project data into a focused report that can be reviewed or shared with stakeholders.

Built for faster decisions.

Reduce time spent searching and compiling information so teams can focus on managing work and solving problems.

Built around your project data.

Use information already captured in ConstructionOnline to make project data easier to understand and act on.

Built for construction teams.

Ask practical questions in everyday language and get insights tied to the way builders manage projects.

Ask Colby. AI-powered project intelligence for ConstructionOnline.

What can Colby create?

With the ability to create To-Dos, draft messages, and schedule calendar events directly in ConstructionOnline, Colby makes it easier to organize work, coordinate teams, and keep projects moving forward. Simply tell Colby what you need, and let your AI assistant handle the details - saving time, reducing administrative work, and helping your team stay focused on building.

Create To-Dos in Seconds

Less Task Management. More Getting Things Done.

Keep your projects moving without spending time manually creating and organizing tasks. Simply ask Colby to create To-Dos for upcoming work, assign responsibilities, and set deadlines - helping your team stay organized, accountable, and focused on what comes next.

Draft Messages Instantly

Better Communication Starts with Colby.

Save time communicating with clients, subcontractors, and team members. Colby can help draft clear, professional messages for project updates, schedule changes, follow-ups, and more—making it easier to keep everyone informed without starting from scratch.

Schedule Calendar Events

Stay on Schedule Without the Extra Steps.

From project meetings and site inspections to important milestones and follow-ups, Colby makes scheduling easier. Simply ask Colby to create calendar events in ConstructionOnline to keep important activities organized and ensure your team knows what's coming up.

Ask Colby.

AI-powered project intelligence for ConstructionOnline.

From project data to project intelligence.

Colby is designed to help builders move from finding information to understanding it. With quick access to project and company-level insights, teams can spend less time assembling data and more time deciding what to do next.

1 Ask

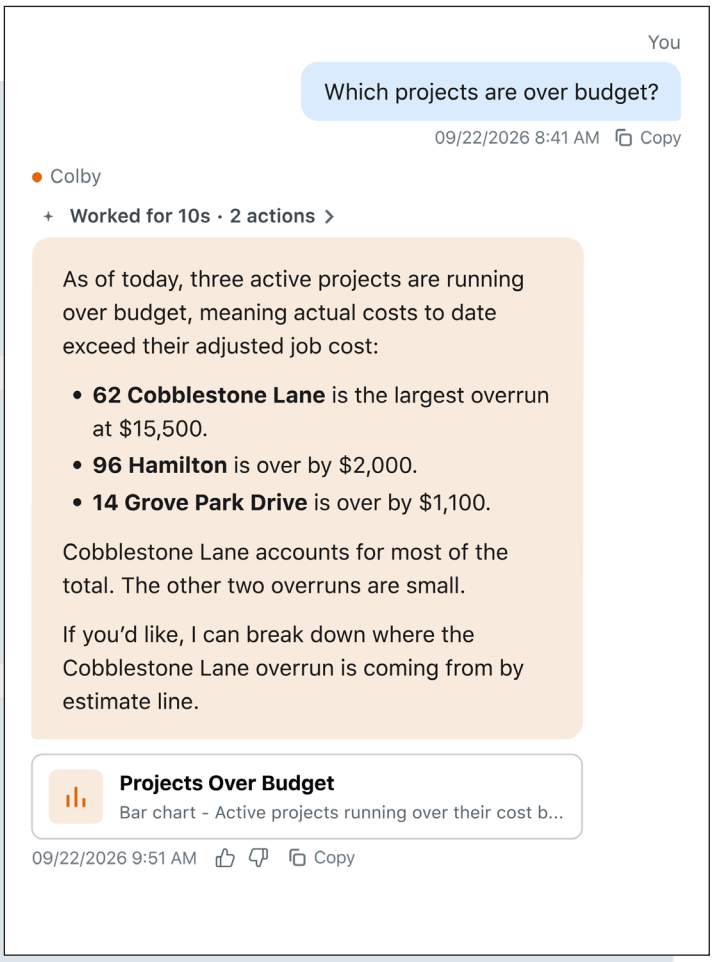

Start with a practical question about a project, schedule, budget, task, deadline or company-wide performance.

2 Understand

Colby brings relevant ConstructionOnline information together to provide a clearer view of the issue.

3 Act

Use that context to prioritize work, review risks, communicate with stakeholders and make more informed decisions.
