

# Alusense

a world of possibilities,  
in every sense...

Alusense is a premium ACM category from ProjetoAlumínio.

A aluminum composite material that awakens the sense of sight and touch, providing unique sensorial experiences and expanding design possibilities with varied finishes.

Ideal for indoor and outdoor projects, adapting excellently to any environment. Recommended for homes, businesses and high-end interiors.

**Resistance and Durability:** Offers superior protection, with high resistance to scratches and impacts, ensuring the longevity of the project.

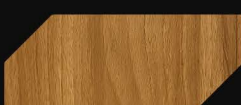

Several options of textures and finishes that simulate sophisticated materials, such as wood, concrete, granite, marble, among others.
