

BLAZE TOOL

PROUDLY MADE IN CANADA

The Blaze Tool is a specialty blade designed to cut through asphalt and architectural shingles that fits on most major brands of oscillating tools.

KEY FEATURES & BENEFITS

- Cuts through reinforced nailing strips
- Push or pull cutting action
- Straight or curved cuts
- Cut valleys, vent holes, peaks, ridges, and edges
- Self-sharpening
- Safer than current hook blades
- Performs well in extreme temperatures
- Long-lasting blade means fewer replacements
