A luxury louvered roof dramatically transforms the experience of your outdoor living space

Imagine a serene shelter in your own backyard with all the comforts you would find indoors, from heating and cooling to lighting, shade, and automated screens for privacy and protection. An Outdoor Elements luxury louvered roof expands the possibilities for relaxing and entertaining outside with a highly customized style that's all your own.

Your space with an Outdoor Elements luxury louvered roof can be a peaceful private retreat or a dynamic party center perfect for grilling and cocktails under glamorous lighting.

Discover the possibilities for an indoor/outdoor space that gives you control over your environment

Louvered roofs are built with horizontal louvers that can be opened and closed to adapt to changing weather conditions. Optional sensors allow you to control your louvered roof to respond to rain and wind. Consider using integrated motorized roller shades or glass doors for added privacy and protection. State-of-the-art control system: Control via smart device app or hand-held remote; manages louvers, LED lights including separate white and RGB LED color changing lights, recessed spotlights, fans and motorized screens.

Next level lighting: Transform your outdoor oasis with our patented integrated LED lighting. Delivering a warm white light and a vibrant RGB color spectrum for customizable mood lighting—from serene ambient glows on a color wheel all powered by an energy-efficient 24-volt system offering precise intensity control from brilliant daylight illumination to soft, dimmed evenings, complete with options for recessed and post-mounted lighting to enhance every gathering.

Made in the USA with precision engineering

An in-depth understanding of architecture informs every aspect of the design, delivery, and installation of Outdoor Elements louvered roofs. Our team shares decades of experience in the construction and manufacturing industries, resulting in unparalleled sophisticated design, premium options, and lasting performance.

Outdoor Elements louvered roofs are manufactured in the United States. All pergolas are manufactured using extruded aluminum materials that are engineered to accommodate wide spans and custom configurations.

Our louvers are designed to be architecturally appealing yet can withstand the harshest wind and snow loads throughout North America. Designed for the customer's ultimate lighting control, with the largest opened spacing between louver to louver when open.
