50% LESS THAN LOCAL MARKET

The factory dedicated to serving builders

Cost Savings

Our products use solid materials at affordable prices, and by selling directly from our factories, we ensure highly competitive pricing.

Wage Savings

Our products come pre-assembled and pre-painted, significantly reducing installation time, labor costs, and overall installation effort.

Rental Savings

Our products are packaged by project units, combining items on one pallet for easy on-site access, thus saving on storage costs.

Time Savings

Our team expertly handles your procurement needs from drawing confirmation to delivery, ensuring a worry-free experience.

OUR VALUES

We keep it simple

We focus on delivering consistently high-quality products. Our meticulous attention to detail ensures that every item meets rigorous standards and exceeds your expectations.

We keep it green

Sustainability isn't just a buzzword for us; it's our operational backbone. From sourcing responsibly to employing eco-friendly manufacturing processes, we ensure that every product is as good for the planet as it is for your project.

We keep it personal

Whether you're around the corner or across the globe, our approach to service remains the same: personalized and responsive. We're here to support your needs with simplicity and efficiency, ensuring a seamless experience from consultation to delivery.

Innovate, integrate

Our design team pushes the boundaries of what is possible in wood manufacturing. With a blend of traditional techniques and cutting-edge technology, we create aesthetically pleasing and functionally superior products that enhance any building or renovation project.

GLOBAL REACH, PERSONAL TOUCH

We influence spans the globe, yet we maintain a personal touch with our customers.

We understand the importance of accessible, responsive service and strive to ensure that every interaction is as satisfying as our products.

Industry Leader

With over a decade of experience supplying major supermarkets in the United States, our annual sales in the North American market have exceeded $10 million.

Favorable Price

Up to 10% lower raw material costs contributed by bulk order needs and stable supply guaranteed by manufacturing process, make it possible for our lower price.

Quality Control

Our products are crafted from high-quality materials and undergo rigorous quality checks to ensure they meet and exceed customer expectations.

As a factory, we know what we produce, with deep knowledge of the U.S. market and create products strictly according to American standards. And we understand the importance of accessible, responsive service and strive to ensure that every interaction is as satisfying as our products.

Our design team pushes the boundaries of what is possible in wood manufacturing. With a blend of traditional techniques and cutting-edge technology, we create aesthetically pleasing and functionally superior products that enhance any building or renovation project.

Best of all, our packages are priced at just 50% of the local market rate, delivering exceptional value without compromising on quality. Let us handle the details, and enjoy a beautifully unified space at a fraction of the cost.

FINISHES

Cabinet finishes are the final coatings applied to the surface of cabinets to protect and enhance their appearance.Finishes can include paint, stain, each providing different textures, colors, and levels of protection. The right finish can protect the material from moisture, wear, and damage while enhancing the overall aesthetic, whether you prefer a glossy, matte, or textured look.

- Sliding Window Series
- Casement Window Series

Hung Window Series

Classic vertical operation with smooth ventilation, natural light, and space-saving performance for residential projects.

Single Hung

Double Hung

SINGLE HUNG GLASS CONFIGURATION

1/8" + 3/4"A + 1/8"
1/8" + 1/2"A + 1/8"

SIZE RANGE

18-7/8" ≤ Width ≤ 43-5/16"
31-7/8" ≤ Height ≤ 74-13/16"

SINGLE HUNG GLASS CONFIGURATION

1/8" + 5/8"A+ 1/8"
1/8" + 1/2"A + 1/8"

SIZE RANGE

20-1/16" ≤ Width ≤ 43-5/16"
32-5/16" ≤ Height ≤ 74-13/16"

Sliding Window Series

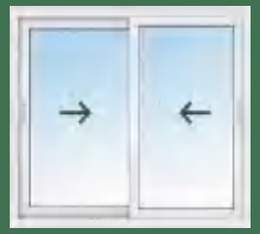

Sliding windows feature a smooth horizontal opening design that is easy to operate and requires no additional interior or exterior clearance. The wide glass area provides clear views and natural light, while the simple, practical structure makes the series well suited for bedrooms, living areas, multifamily housing, and other residential projects.

Single Sliding

SINGLE SLIDING SIZE RANGE

31-7/8" ≤ Width ≤ 70-7/8"
17-3/4" ≤ Height ≤ 55-1/8"

Double Sliding

DOUBLE SLIDING SIZE RANGE

32-5/8" ≤ Width ≤ 70-7/8"
19-1/4" ≤ Height ≤ 55-1/8"

Casement Window Series

Casement windows open outward to provide wide, unobstructed views and excellent ventilation. With a tight compression seal and easy-to-operate hardware, they offer reliable performance for residential and multifamily projects.

SPC Flooring

SPC flooring is made from a robust stone-plastic composite, offering excellent strength and waterproof properties, making it ideal for any room, including kitchens and bathrooms. With a variety of designs that mimic the natural appearance of wood or stone, SPC flooring combines practicality with modern aesthetics, providing a durable and attractive foundation for your home.

APPLICATIONS

- Corporate Offices
- Residential
- Retail
- Hospitality

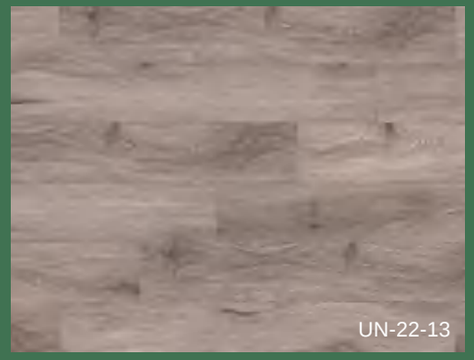

Veneer Selection

Explore our SPC Veneer Selection, offering a range of high-quality finishes that combine the durability of stone-plastic composite with the natural beauty of wood or stone textures.
This selection provides a perfect blend of strength and style, ensuring your floors remain both resilient and visually appealing in any space.

Engineered Wood flooring

United Wood uses its many years of experience and its knowledge about the individuality of trees to make an attractive product range out of wood, with different formats, grades and surface treatments. Wood not only plays a critical role in terms of looks,but is also used exclusively in the 3-layer sandwich composition of Parador engineered wood flooring. What is more, intelligent click systems make tools superfluous and installation particularly easy and stable.

1.Top layer

High quality solid wood with a thickness of up to 4 mm is enhanced with a lacquer finish or naturally oiled surface. The lamellar impregnation on the ends and the all-round impreg nated top layer prevent moisture from penetrating and provide increased swell protection.Drying the wood gen tly prevents the formation of cracks.

2.Solid spruce-fir middle layer

The solid wood core with raised annual rings gives Parador engineered wood flooring its excellent dimensional stability even under heavy duty use.
The patented click mechanism milled into the wood ensures a long-lasting stable connection.

3.Balancing veneer

Produced in the resource-saving hulling process, the balancing veneer made of solid spruce gives the planks extra dimensional stability.

4.Click connection

The patented Parador click connections guarantee quick, easy, uncomplicated installation with high pull-out resistance and a long-lasting strong connection.
For a permanently attractive floor covering and a strongbond between the individual planks. As the planks are self-aligning, a floating installation and gluing the whole area are easily possible. This is pleasing too: once the floor is installed, it is immediately ready to use.

Automatic-Click system

With its patented click mechanism, the Automatic-Click system ensures easy installation and optimal results every time.

Automatic-Click system

Innovative Allround-Click system without the need for left and right-hand tongues for a particularly easy installation.

Veneer Selection

Explore our Veneer Selection, offering a range of premium wood finishes that highlight the natural beauty of each grain. Whether you seek classic or contemporary styles, our veneers provide a refined and durable option to elevate your designs with authentic wood textures and rich tones.

Mouldings

1. **ARCHITRAVES:** In classical architecture, it described the main beam resting on the tops of the columns. Today it is often used as a decorative moulding for ornamentation or finishing at the top of windows and doors.

2. **BASEBOARDS**: Baseboards are placed along the wall at the floor. They should be chosen to work in harmony with your casings to finish and tie the room together. Baseboards are usually thinner than the casing.

3. **BUILD-UPS:** Combining two or more moulding profiles to create a new or custom look. Also called stacking, build-ups make it easy to create the look of custom made trimwork without the high cost.

4. **CASINGS:** Casings define the overall character of a room and are often the most visible part of the trim. They are used primarily to cover the gap between drywall and the door or window frame. Casings are generally thicker than the base mouldings.

5. **CROWNS:** Crowns are placed along the wall at the ceiling. They come in a wide range of patterns and sizes. Crowns soften the transition from wall to ceiling while adding a distinctive look and charm to your room.

6. **FINISH BOARDS:** Finish Boards come in either S4S (Surfaced 4 Sides) or S3S (Surfaced 3 Sides) and are used for a multitude of purposes including shelving, window liner, bases, casing, etc.

7. **PANEL MOULDS:** Panel Moulds are used to frame wall paneling and add an accent to your walls. Often used in furniture construction.

8. **RAKE MOULD:** Rakes are often used as crowns. In fact, they are sometimes called “solid crowns”.

9. **WAINSCOT:** Trimwork installed in the area below a chair rail. Numerous options are available including raised panel, shadow box and beaded. Combined with a chair rail and baseboard, Wainscoting creates a dramatic look to any room.

10. **WINDOW STOOL:** Also called window sill, a Window Stool is the surface installed below the sash of a window. Trim installed under window stool creates a distinctive look and adds a decorative touch.

Wainscot Pack

Elevate your space with our Wainscot Pack, a curated collection of diverse moldings designed to create elegant and cohesive wainscoting.

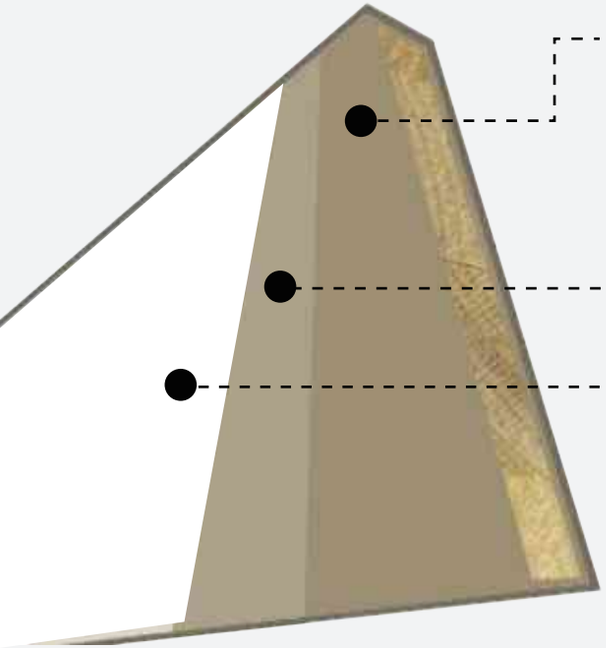

Each pack brings together meticulously crafted pieces that add a touch of sophistication to your walls.

Whether you seek a bold statement or subtle elegance, our Wainscot Pack offers a versatile solution to meet your design needs.

S4S Board

- S4S (Surfaced Four Sides) moulding is machined to have a perfectly smooth surface on all sides, ensuring a clean and polished look.
- S4S moulding is typically pre-coated with a protective finish, like a water-based primer or UV coating, for added durability and a ready-to-paint surface.
- S4S moulding can be easily painted or stained to achieve the desired color and finish, offering added protection and customization.
- S4S moulding is typically made from high-quality wood, such as pine, oak, or other hardwoods, known for their durability and aesthetic qualities.
- The wood is precisely cut and planed to uniform dimensions, ensuring consistency in every piece.

UWG uses its proprietary special coating to fully seal the wood. This advanced coating, developed by UWG's engineers, replaces the traditional gesso used by some offshore manufacturers. Composed of wood flour and semi-water-soluble resins, this coating forms a strong bond that completely seals the wood's surface.

The piece is then sanded; a second coat of the applied with "white" tint to help transition for the primer.

Apply a final layer of water-based primer as the outer coating.

Exterior glue is used throughout manufacturing steps listed above.

Versatile Trim Solution

It is suitable for a wide range of applications, including trim, casing, baseboards, and other decorative purposes. The even finish adds a refined, professional appearance to any project, enhancing the overall aesthetic.

Shilaps

- Natural Wood Shiplap
- Sleek Finished Shiplap
- Rustic Collection Shiplap
- Charred Wood Shiplap

Natural Wood Shiplap

Experience the natural elegance of our Wood Shiplap. Each piece showcases the wood's grain with a refined brush finish, and with optional thermal treatment, these panels are durable enough for exterior use. Enhance your outdoor space with the organic beauty of our shiplap.

Optional Styles

Sleek Finished Shiplap

Introducing our Sleek Finished Shiplap, designed for refined sophistication. With a smooth paint finish that hides the wood's texture, it offers a polished, elegant look. Ideal for enhancing interiors, this shiplap serves as a versatile canvas for your style, adding subtle elegance to any design.

Optional Styles

FARMHOUSE WHITE | PRIMED | GRANITE GRAY | CAVALRY BLUE | MIDNIGHT BLACK

Rustic Collection Shiplap

Rustic Collection Shiplap celebrating natural beauty and timeless charm. With an authentic rustic finish, it highlights the wood's natural textures and imperfections, creating a warm and inviting atmosphere. Each panel is crafted to showcase unique characteristics, offering a cozy, rugged elegance that fits a range of design styles.

Optional Styles

Charred Wood Shiplap

Introducing our Charred Wood Shiplap, designed to make a bold statement. The charred surface accentuates the wood's grain and texture, creating a striking, textured appearance.
Ideal for adding dramatic flair and individuality to any space.

Optional Styles

SMOKE ASH NATURAL CANYON

Stair & Millworks

Elevate your home with our Stair & Millwork collection. Expertly crafted for both style and durability, our stair components and millwork accents add elegance and character to any space. With a focus on quality and precision, each piece enhances your interiors, creating a lasting impression of timeless beauty.
