## WORK MANAGEMENT SOLUTION

HBS was built from the ground up to include the features home builders need to solve issues facing them every single day. HBS is based on improving production through efficiency and team member accountability.

### ROLE-BASED AUTOMATED DAILY CHECKLISTS

An automated daily list of actionable items, with direct commenting, on which each team member needs to focus.

### MODELS + VARIATIONS

Automate project starts with manageable custom models using exclusive model variations.

### BILLING ITEM LIBRARY WITH VENDOR SUPPORT

A tightly integrated robust library of billable items with matching vendor item selection options.

### PROJECT OPTIONS

Add options to projects from your custom library vastly reducing omissions and mistakes.

### TEAM MEMBER ACCOUNTABILITY

What gets measured gets done. HBS keeps leaders informed as to what is holding up productivity.

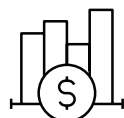

### CUSTOMIZABLE QUALITY CONTROL FORMS

When your team verifies work has been completed, present them a list of custom items they need to inspect.

### MATERIAL LEAD TIME INTEGRATION

Built-in custom product lead-times ensures material is ordered on-time.

### KEY PERFORMANCE INDICATORS

Setup notifications, reporting and more using named events (milestones), defining custom system event triggers.

# CONTROL COSTS WITH PURCHASE ORDERS

HISTORICAL  
DATA

Purchase orders are essential for streamlining your projects. By clearly outlining the materials, quantities, costs, and delivery schedules, they ensure transparency and accountability between you and your suppliers. Using **purchase orders helps prevent miscommunications, controls costs, and keeps projects on track by creating a clear paper trail for every transaction.** Whether you're managing one home or multiple builds, incorporating purchase orders into your workflow enhances efficiency and reduces unnecessary delays.

**HBS'S ONLINE BILLING ITEMS AND PURCHASE ORDER APPROVAL PROCESS CONTROLS SCOPE OF WORK AND PRICE CREEP.**
