Wall Slat Panels

Castle Oak on Bronze

Matte Black on Bronze

Easy installation

The panels are designed with a tongue-and-groove mechanism for simple installation, using only glue and screws. Panels can also be nailed onto a wood frame. No skilled labor needed.

Quality & design

The panels are composed entirely of MDF, without felt backing, for a higher-quality and design-focused product. Custom design requests are also possible.

Eco friendly

The wall panels are a wood-based product made of high-quality PEFC-certified wood, and can be easily relocated if installed onto a framework, extending its lifespan and reducing waste.

Acoustic properties

The acoustical properties reduce noise pollution, creating spaces conducive to relaxation and productivity.
