# Why Switch to Solar Street Lights?

Many new developments now feature **Solar Street Lighting** in at least a portion of their new developments as builders recognize the wide-ranging benefits.

## Here's why they're switching:

- The lights become an asset for the property once paid-in-full.
- Solar street lights are installed quickly with virtually no impact.
- NO consumption or usage fees.
- With our leasing program, there's a finite number of lease payments with NO price increases.

## Convenient Payment Options:

Some builders prefer up front payment, but others prefer our leasing program.

Our leasing program includes:

- 10 to 30-Year lease terms.
- 10% deposit upon approval.
- Remaining project value converted to leasing agreement.
- Lease agreement transfers to the HOA/CDD/Owner after development.
- Labor warranty in effect for the entirety of the leasing agreement.
