

# Better & Better!

Haas Door's American Tradition™ Series gets better and better! We've taken the natural benefits of our 5200 Series aluminum garage doors and added them to our popular American Tradition™ Series. The corrosion-resistant aluminum is perfect for weather resiliency, and the 2" full thermal break with environmentally compliant polyurethane provides thermal performance. The joints between the sections come with a bulb seal that is code-compliant for air infiltration.

It gets even better! The aluminum is available in our 9200a series that includes 42 model choices that use overlay boards to create a realistic depth to the door, flush or v-groove panel styles, inverted options, and models that allow not one, but two lite sections.

Combining the benefits of performance and style with handcrafted, low-maintenance materials ensures that each door is a testament to our commitment to quality. With the American Tradition™ Series, you can open the door to endless possibilities.

open the door to  
endless possibilities

U-Factor uses a solid door assembly. Adding lites will affect the tested U-Factor.

## AMERICAN TRADITION™ SERIES

### 9200 & 9200a Models

- 26 Gauge Galvanized Steel models 2<sup>5</sup>/<sub>8</sub>" Thick, 0.081 Tested U-Factor
- 24 Gauge Corrosion Resistant Aluminum models 2<sup>5</sup>/<sub>8</sub>" Thick, 0.110 Tested U-Factor
- Air Infiltration Seal 0.25 CFM/Sq-Ft
- Aluminum sections available in Polar White, Sandstone & Carbon Black

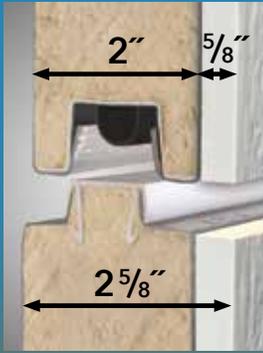

### 9600 Models

- 2" Thick, 0.096 Tested U-Factor
- 26 Gauge Galvanized Steel

- Inverted Styles and V-Groove Section Options
- 42 Models with Multiple Style Options
- Full Thermal Break with Environmentally Compliant Polyurethane Insulation
- Polyurethane Overlay Boards
- Wood Grain embossed
- 12 Solid & 5 Wood Grain Color Options
- 15 Overlay Color Options
- 10 Window Options
- Industry Leading Warranty

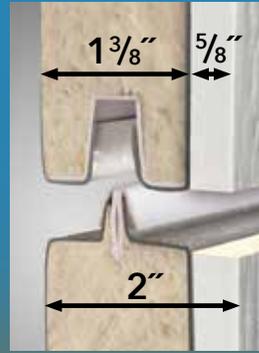

# Door Design Options

## 9200 & 9200a Models

- 2<sup>5</sup>/<sub>8</sub>" Thick with Overlay
- Steel 0.081 Tested U-Factor
- Aluminum 0.110 Tested U-Factor
- Air Infiltration Joint Seal 0.25 CFM/Sq-Ft
- Full Thermal Break
- Environmentally Compliant Polyurethane Insulation
- 26-Gauge Galvanized Steel or 24-Gauge Corrosion Resistant Aluminum
- Polyurethane Overlay Boards
- Wind Load & Impact Options
- Lites available in top two sections
- Max Width = 20'2"
- Max Height = 16'0"

## 9600 Models

- 2" Thick with Overlay
- 0.096 Tested U-Factor
- Full Thermal Break
- Environmentally Compliant Polyurethane Insulation
- 26-Gauge Galvanized Steel
- Polyurethane Overlay Boards
- Wind Load & Impact Options
- Lites available in top two sections
- Max Width = 18'2"
- Max Height = 16'0"

All models shown are available with multiple design options: 9200, 9200a & 9600 models, flush or v-groove base panel option, and single or double door styles. Most models are available with plain or arch top sections. Some designs can be inverted to match other features on the home. See the best option directly on your home by using our online visualizer at [haascreate.com](http://haascreate.com).
