

# Double Feature.

Haas Door introduces Double SlimLine for double the light. With the addition of windows to the garage door increasing in frequency year after year, having unique offerings for customers is an excellent way to differentiate in the marketplace that consumers can take advantage of. Consumers now have the option of Carriage House, Ranch, Standard, TL, SlimLine, and Double SlimLine to match any exterior of the home or project.

The unique look of Double SlimLine offers a style with plenty of light to illuminate the garage, but also provides a smaller glass area for a more secure opening. Double SlimLine frames can match the color of the door, or are also available in black: match the door to blend in or make the window pop! With all the options for windows, glazing, and positions, and now Double SlimLine, Haas Door has a window feature that is doubly perfect for your project.
