Deploy AI

Convert drawings to real-time cost estimates based on item-level materials and labor pricing.

Cost Database

Combine your data with our extensive and localized cost database.

Input a Drawing

Input

AI Reads Drawings

Instantly parse architectural elements like rooms, walls, and windows, and generate a system-ready component list.

Supports all major formats — including PDFs, Revit, and more.

AI Reads

Output

Estinamtion

Seamlessly converts AI interpretations into detailed cost breakdowns, using live materials and labor pricing.

Instantly turns AI-powered takeoffs into accurate, real-time cost estimates.

Quotr Output

Output

Real-time Database

Enrich your estimates by combining your data with our localized, real-time cost database.

Quotr provides international cost insights for deeper, more competitive comparisons.

Input

+ Historical Database

Quick Take-off

✓ Completed

Leverage AI to instantly convert plans into detailed, real-time cost breakdowns — down to the material and labor level.

Standardize your preconstruction process with Quotr and turn every project into a source of structured, analyzable data for smarter decision-making.
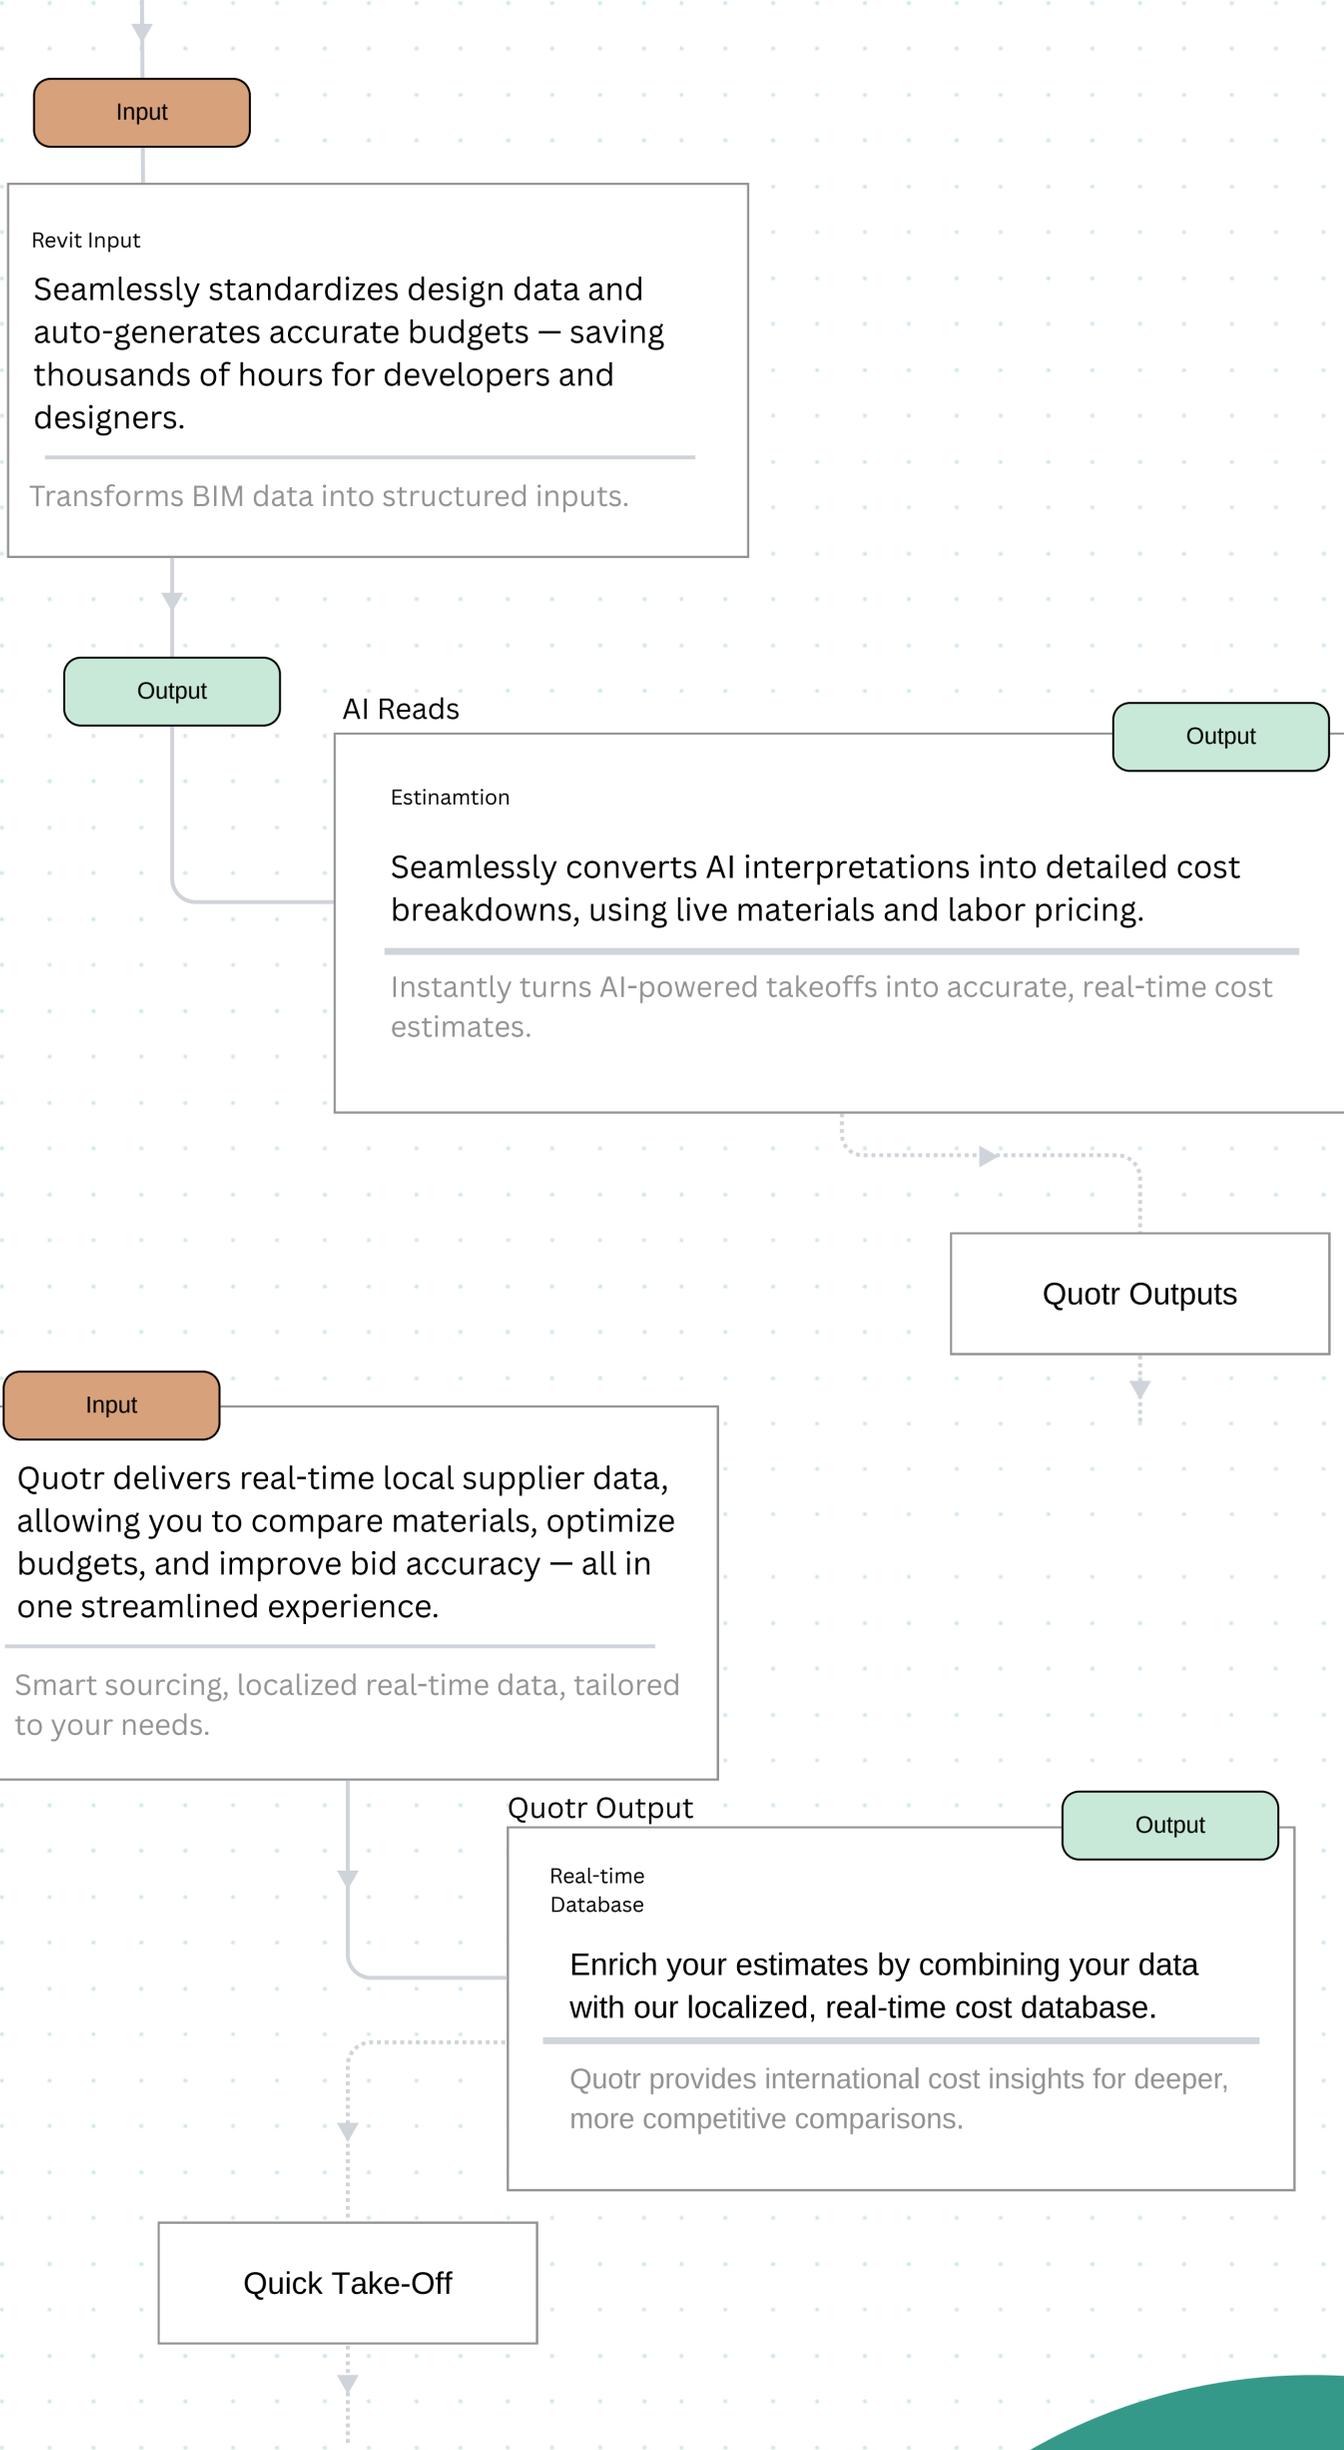

BOOK A DEMO

quotr.io

Revit Integration

One-click export from Revit to Quotr with a built-in plugin.

Supplier Insights

Find suppliers in your area providing the exact materials necessary for your projects.

Input

Revit Input

Seamlessly standardizes design data and auto-generates accurate budgets — saving thousands of hours for developers and designers.

Transforms BIM data into structured inputs.
