

U382 FIREWALL

SOUND - SAFETY - SUSTAINABILITY - SATISFACTION

Every homeowner wants the same things: comfort and security. This is especially true when living in multi-family residential communities. Though, often, neighbors can impact your ability to acquire those intangibles. With the Nu-Wool U382 Firewall system, achieving sound control, safety and security, sustainability, and overall satisfaction is now possible.

When living in multi-family residential spaces, sound control is crucial. With Nu-Wool's U382 firewall system, you can experience the comfort of quiet spaces, regardless of what your neighbors are up to. Live in a space that provides the luxury of sound control!

Sound Performance

STC Rating:

52 - one layer gyp. bd. ea. side

62 - two layers gyp. bd. ea. side

Fire Protection

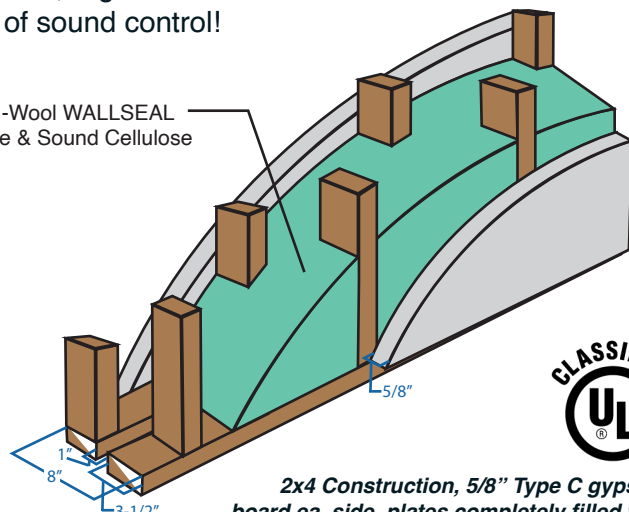

Fire Rating: 2.5 Hrs. (2-3 Hrs.)

2 Hrs. - one layer gyp. bd. ea. side ; 3 Hrs. - two layers gyp. bd. ea. side

Safety and security are top of mind for any home owner. Nu-Wool WALLSEAL Fire & Sound Cellulose Insulation used in Nu-Wool's proprietary UL-U382 firewall design offers unparalleled fire resistance. The U382 firewall system is an industry-leading design that provides protection to you, your family, and your belongings in the case of a potential fire next door.

Nu-Wool WALLSEAL
Fire & Sound Cellulose

2x4 Construction, 5/8" Type C gypsum board ea. side, plates completely filled with Nu-Wool WALLSEAL Fire & Sound Cellulose Insulation, with 1" space between plates

Overall Performance

With exceptional sound control and fire resistance, the performance of Nu-Wool's U382 firewall system can't be beat! Additionally, Nu-Wool WALLSEAL Fire & Sound Cellulose Insulation can prevent air infiltration, as the insulation fills the entire firewall cavity, eliminating voids and air pockets common with most other firewall designs. Another added bonus of the U382 firewall system is its ability to prevent odor transmission between units. As an owner of a multi-family residential property, you should be able to enjoy the luxury of having your space be entirely your own. Through the performance of the UL-U382 design and Nu-Wool WALLSEAL Fire & Sound Cellulose Insulation, you'll be satisfied knowing that your home can be exactly that!

Sustainability

Made from recycled paper content and treated with a naturally-occurring fire retardant, Nu-Wool WALLSEAL Fire & Sound Cellulose Insulation is a eco-friendly insulation. It's engineered to achieve peak performance standards without compromising on its sustainable makeup. We're firm believers that the best products can still have a positive environmental impact!
