flex POWER[®]

PRODUCT LINEUP 2026

Driving INNOVATION™

At Flex Power®, powered by RV Mobile Power (RVMP®), we believe that power should create freedom, not limit it. Whether you are traveling, working, or living off the grid, Flex Power® products are built to keep you ready, connected, and in control. Although our roots began with RVMP® in 2017, our evolution into the Flex Power® brand reflects a sharper focus on modern power solutions designed for real people with real needs. What has not changed is our commitment to treating every customer and team member like family. We make honorable decisions, build with integrity, and innovate with the relentless drive of an underdog.

Every Flex Power® unit is engineered for performance, reliability, and responsibility. We design to meet or exceed EPA, CARB, CSA, and USFS standards because dependable power should also be environmentally respectful. Cleaner emissions, safer operation, and smart, user-focused design are at the core of what we deliver.

Flex Power® grew out of RVMP's founding belief that companies should always do the right thing, even when it costs more or takes longer. That principle continues to guide everything we create as we redefine what portable power can be.

- Jobsite Hero
- Storm-Ready Backup
- Power for Vendors
- Farm and Outdoor Friendly

Open-Frame Series Generators

Introducing the **NEW** Flex Power® Open-Frame Series, built to deliver rugged, reliable power when and where you need it most. Available in 3700W, 9000W, and 13000W models, this lineup is engineered for versatility and serious performance. Whether you're powering a jobsite, preparing for storm season, keeping a food truck running, supporting outdoor vendors, or simply wanting dependable backup power for your home, **the Open-Frame Series is designed to handle it all.** Durable, efficient, and ready for real-world demands, these generators bring confidence to any situation where power matters.
