

INNOVATIVE HOMES
TURNKEY SOLUTIONS
NATIONWIDE REACH

CHAMPION[®]
HOMES

Quartz Properties
Asheville, NC

We leverage the benefits of offsite construction to transform the homebuilding industry, making quality homes more affordable and accessible across the United States and Canada.

Champion® delivers an extensive range of homes, each designed by our award-winning architectural team to suit various homebuying and development scenarios. Our stylish and affordable homes are built on expedited construction timelines compared to site-built alternatives, which accelerates speed to occupancy and helps families and communities better meet their housing needs.

Creating Opportunity

The current housing crisis impacts the lives of individuals and families across the country. As a national leader in offsite construction, Champion is uniquely positioned by our scale and innovative approach to help make the dream of a quality home a reality for those affected by shortages and high costs. We believe that quality homes should be attainable and work every day to put them within reach of greater numbers of residents.

Nationwide Solutions

Champion Homes operates 46 manufacturing facilities across the United States and Western Canada – more than any offsite homebuilder in North America.

We leverage significant economies of scale by combining the specialized expertise of our workforce of approximately 9,000 employees with the bulk purchasing power and logistics capabilities that come with being a nation-wide industry leader in homebuilding.

We build homes that complement regional design preferences and offer options for various specification levels from top-of-the-line custom modular homes to hyper-affordable manufactured models.
