

While creating an air gap behind cladding is important it also presents another challenge; bugs, bats, rodents and other pests can find the space behind the cladding to be a particularly inviting nesting place which is why Ventrim¹⁰ was developed. Ventrim¹⁰ is used at the top and bottom of the wall to neatly close off the void behind the cladding preventing a pest invasion, while still providing ventilation. Made of tough PVC, Ventrim¹⁰ is a perfect way to *Cap the Gap*.

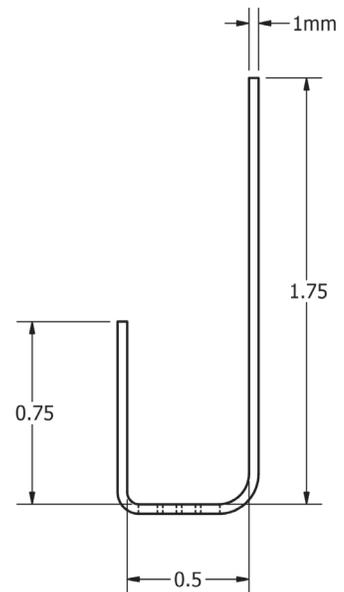

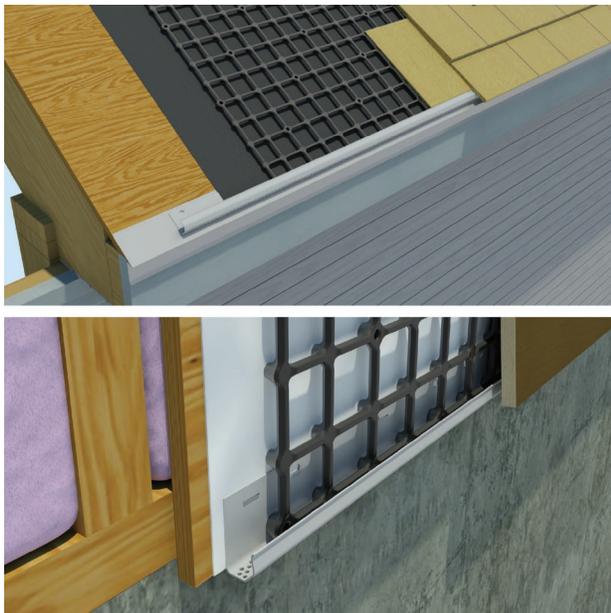

Ventrim¹⁰ Advantages

- Self-sealing design keeps pests out
- Provides superior ventilation and drainage
- Fast and simple installation
- Non organic – Rot and mold resistant
- Made from durable long lasting PVC plastic

Fast & Easy Installation

- Lightweight for easy handling
- Fewer fasteners required - save time and labour
- Easy to cut - no power tools required
- Pre-formed fastener holes for fast & easy installation

SPECIFICATIONS	
Length/Piece	8 ft (2.44m)
Width/Piece	1/2 in (13mm)
Height	1-3/4 in (44mm)
Mounting Face	3/4 in (19mm)
Height Front Lip	3/4 in (19mm)
Weight/Piece	0.7 lbs (0.3kg)
Mounting Hole Spacing	4 in (102mm)
Material Type	PVC
Cutting Method	Hand Shears

NOTE: OPEN AREA 0.096 IN²/IN
