

## FOR IMMEDIATE RELEASE

### **DreamzCMMS Launches Cutting-Edge Construction Project Management Software to Streamline Operations**

Las Vegas – 2/25/2025 – DreamzCMMS, a leading provider of maintenance and asset management solutions, has officially launched its **Construction Project Management Software**, designed to enhance efficiency, improve compliance, and maximize asset performance for construction companies worldwide.

DreamzCMMS's state-of-the-art software offers an all-in-one platform with features such as **Sales & Estimating, Construction CRM, Estimating, Contracts & eSignatures, Bid Requests, Lead Management, Project Management, Mobile App, Tasks & Scheduling, Time Tracking, Files, Photos, & Videos, Sub & Vendor Portals, POs & Work Orders, Customer Invoices, Reporting, Customer Portals, Messaging, Collect Online Payments, Warranties, QuickBooks & Sage, Gusto Integration, and Zapier Integration**. It also integrates asset lifecycle management, work order automation, preventive maintenance, spare parts inventory tracking, and AI-driven predictive maintenance.

“With this launch, we aim to revolutionize the construction management space by offering a **powerful, cloud-based solution** that enhances visibility, optimizes workflows, and drives cost savings,” said Greg Christofolo, Managing Director at DreamzCMMS. “By leveraging advanced technologies such as **AI-powered checklists and predictive maintenance**, construction companies can significantly **reduce downtime and increase operational efficiency**.”

Key benefits of the DreamzCMMS Construction Project Management Software include:

- **Seamless integration with ERP and third-party systems** for enhanced data management.
- **Centralized incident tracking** to ensure compliance and workplace safety.
- **Smart analytics and dashboards** for real-time decision-making.
- **Mobile CMMS functionality** to empower field technicians with instant access to project details.

The software is tailored for **contractors, project managers, and facility managers** looking to **minimize inefficiencies and improve project execution** in the construction sector.
