

FOR IMMEDIATE RELEASE

Broan-NuTone's Fresh In™ Premium Supply Fan: Smarter Ventilation for Today's Homes

Revolutionizing indoor air quality with advanced intelligence, energy efficiency, and design flexibility.

Hartford, Wis. (February 25, 2025) – [Broan-NuTone](#) is proud to introduce the [Fresh In™ Premium Supply Fan](#), the latest innovation in supply ventilation, at this year's International Builders Show (IBS). Designed to address the needs of today's energy-efficient homes, the Fresh In™ Premium Supply Fan provides a seamless balance of performance, efficiency, and homeowner comfort. Whether meeting building code requirements or personalizing indoor air quality, this advanced ventilator sets a new standard in smart ventilation.

Smart Ventilation for Modern Homes

In tightly constructed homes, bringing fresh air indoors is more essential than ever. The Fresh In™ Premium Supply Fan is equipped with built-in intelligence to monitor outdoor temperatures and humidity over a 48-hour period, utilizing an advanced algorithm to determine the optimal operation time while synchronizing with the home's HVAC system. This ensures that ventilation only occurs during ideal conditions. With five user-selectable comfort modes and convenient "set it and forget it" functionality, homeowners can customize airflow to suit their climate zone while ensuring adherence to the latest building code requirements, enhancing year-round comfort.

Building Code Compliant and Energy Efficient

The Fresh In™ Premium Supply Fan meets the latest building codes and energy-efficiency standards while delivering reliable performance. Equipped with a powerful, energy-efficient ECM motor, it provides up to 180 CFM at 0.2" w.g. and offers up to 45% energy savings compared to other units on the market. Its ENERGY STAR® certification ensures optimal efficiency, while its constant airflow capability delivers dependable ventilation without sacrificing energy performance—giving building professionals and homeowners confidence in compliance and comfort.

Installation Made Simple

Designed for maximum flexibility, the Fresh In™ Premium Supply Fan fits anywhere—from attics to basements to interior spaces—with straightforward installation. Key features include:

- Vent controls positioned at the front of the unit for easy access in tight spaces.
- A paintable filter access door that blends seamlessly with interior designs.

- Fits seamlessly into various locations including wall, attic or basement. Low profile design for ceiling or wall installation, featuring a paintable door and optional trim kit.

Smarter Features for Better Performance

Engineered for superior usability, the Fresh In™ Premium Supply Fan incorporates advanced features that simplify installation, optimize performance, and improve serviceability:

- Optional MERV 8 or MERV 13 filters remove particulates to improve indoor air quality.
- Test port is accessible even after ductwork is installed.
- A large CFM speed adjustment switch ensures precise ventilation control.
- An LED operating status indicator and labeled wiring callouts reduce setup time and the risk of errors.
- A removable instruction label provides guidance during installation and troubleshooting.

Enhanced Comfort, Reduced Callbacks

With its innovative design and user-focused features, the Fresh In™ Premium Supply Fan helps building professionals reduce service calls, ensuring customer satisfaction. By ventilating only during the best times of day and minimizing issues like humid or cold drafts, the Fresh In™ Premium Supply Fan delivers a superior indoor environment without compromise.

From Design to Installation, the Fresh In™ Premium Supply Fan Delivers

Broan-NuTone remains committed to delivering cutting-edge solutions that combine quality, efficiency, and reliability. The Fresh In™ Premium Supply Fan is the ideal choice for professionals looking to meet code requirements, maximize profitability, and provide homeowners with customizable comfort.

Visit Broan-NuTone at Booth C5907 during IBS 2025 to experience the Fresh In™ Premium Supply Fan firsthand and see how it's setting a new standard for smarter, energy-efficient ventilation. Our experts will be on-site to answer questions about the fan's cutting-edge features and discuss how it can transform your next project.
