

Legend Valve @ The Builder's Show

For Immediate Release

Las Vegas, NV. February 25, 2025. Legend is attending NAHB's Builder's Show in Las Vegas. From 2/25 to 2/27, connect with their industry experts at [Booth SU1139](#) to see SmartClick, HyperPure, HyperFlex, and their new transparent fitting system, ClearLOC, in action! They'll also unveil the M-8330HC, an upcoming high-capacity stainless steel manifold for radiant hydronic systems.

Legend offers a complete line of valves, fittings, tube, and other components for residential, commercial, and industrial applications, including radiant hydronic systems. Since 1988, they've set the industry standard by building a reputation for being every customer's lowest-cost supplier. Their core mission is to astonish customers with quality products, service, and guaranteed performance.

Featured Products at IBS 2025

ClearLOC: The Advantage is Clear with Legend's New Transparent Push-Fits

ClearLOC, Legend's all-new line of transparent push-to-connect fittings, has been nominated as a "Best of IBS" Finalist in the *Most Innovative Construction Tool* category.

Unlike traditional push-fits, which require measuring and marking the fitting's insertion depth, ClearLOC allows installers to see inside the fitting and validate the connection, reducing installation times by up to 50% when compared to traditional push-fits. Simply **cut** the tube, **insert** it into the fitting, and **visually confirm** that it touches the internal stop line.

ClearLOC fittings have been rigorously tested and third-party certified for use in hot and cold potable water systems in both domestic and commercial settings using PE-RT, PEX, copper, and CPVC tube. The system is authorized for behind-the-wall use, can be buried below ground, and can be used in compressed air systems with a maximum oil concentration of 25 mg/m3.

SmartClick: The Future of Permanent Push-Fits

SmartClick is the future of tool-free, permanent fittings, installing up to 35% faster than traditional PEX fittings. They're designed for domestic and commercial potable water lines and radiant hydronic heating systems and are approved for true no-access "behind the wall" installations and underground burial. Made with durable materials like PPSU, DZR brass, polycarbonate, and steel, these fittings are built to last. Backed by a 30-year system warranty, you can count on SmartClick.

HyperPure: Next Generation Potable PE-RT Tube

HyperPure is a game changer in the world of potable plastic tube for hot and cold water. Its exceptional strength, workability, and lack of chemical additives make it the go-to for plumbers and contractors. This PE-RT tube can be used in the same applications as PEX and is accepted by both National and International Plumbing Codes. Incredibly strong and workable, HyperPure is compatible with many different fitting systems, including crimp, expansion, push-fits, and fusion welds. A lack of chemical treatments during production eliminates the need to flush lines and allows job site waste to be recycled (HDPE 02 compliant).

HyperFlex: Highly Flexible PE-RT Heating Tube with an Oxygen Barrier

HyperFlex revolutionizes radiant hydronic heating systems. This incredibly flexible PE-RT tube is ideal for radiant hydronic heating projects ranging from residential homes to expansive commercial facilities, including indoor radiant heating and cooling and outdoor applications like snowmelt and turf warming. HyperFlex's five-layer design includes a central O₂ barrier core of EVOH, which blocks oxygen permeation and prevents oxidation. The PE-RT layers provide exceptional temperature resistance, hydrostatic strength, and flexibility, ensuring long-term performance and compatibility with all commonly available fitting systems.

About Legend Valve

Legend Valve offers a complete line of valves, fittings, tube, and other components for residential, commercial, and industrial applications, including radiant hydronic systems. Our product array includes ClearLOC, SmartClick, LegendPress, LegendPressCSG, HyperPure potable PE-RT tube, and HyperFlex radiant heating PE-RT tube. Our industry-leading lines of PE-RT tube are manufactured in Michigan, USA.

We've got your back.® Since 1988, Legend has set the industry standard by building a reputation for being every customer's lowest-cost supplier. Our core mission is to astonish customers with quality products, service, and guaranteed performance. We deliver what others promise:

- 100% Line-Item Fill Rates
- 100% Line-Item Accuracy
- 24-Hour shipping
- No Restocking Fees
- No Minimum Order Sizes
- No Case or Carton Requirements
- Direct to Job Site Drop-Shipping

The 7/75 Guarantee also proves our commitment to providing only the highest quality products. It warrants all our 10,000+ products for up to seven years from the original date of purchase. If an item is proven defective, we'll replace it for free and pay the contractor \$75 to help offset the callback cost.

As an employee-owned company, we take pride in providing unparalleled service in every aspect of our business. From our high-quality products, service-first approach, and guaranteed performance to investments in technology, shipping optimization, and the 7/75 guarantee, we strive to make every interaction legendary.
