

We deserve to enjoy a better life

For centuries, toilet odors have been one of the most persistent yet overlooked problems in daily life.

Even if the person using the toilet keeps the exhaust fan running, sprays air freshener, or even performs a “courtesy flush,” the situation is always the same when he walks out:

the person entering next frowns, covers their nose, and mutters complaints; the person coming out feels embarrassed and uncomfortable, carrying an invisible “odor trail” — because much of the smell still clings stubbornly to his clothes, hair, or skin.

Beyond social awkwardness, there is a real hygiene risk.

Every odor you smell — and even those you don’t — disperses through the air and settles onto towels, toothbrushes, cosmetics, clothing, and more.

Do these odor molecules and tiny airborne aerosols carry viruses or bacteria?

Or do you still remember the anxiety of using public restrooms during COVID-19?

This problem is also the classic “dad dilemma” in many households.

Among children and wives, the person most often complained about in the bathroom is always the father.

This trouble is nearly universal, yet for decades, no solution has truly addressed the problem at its source.

ODORUN: A Revolutionary Solution

Today, a breakthrough technology has arrived: **ODORUN**, the world's first instant toilet deodorizing device.

Unlike traditional methods that mask, absorb, or filter odors, ODORUN uses advanced vacuum technology to extract odor directly from inside the toilet within **one second**, channeling it through a patented venting assembly into the drainpipe and ultimately releasing it outdoors through the building's DWV (Drain-Waste-Vent) system.

This innovative method fundamentally changes a century-old problem of bathroom odors, achieving true deodorization rather than temporary cover-ups.

How ODORUN Works:

- A high-speed, powerful fan creates strong negative pressure to quickly draw out odors.
- The patented venting assembly directs odors into the drainpipe through the toilet's mounting holes.
- Odors are safely expelled outdoors through the building's DWV system, keeping the bathroom fresh.
- A one-time installation provides long-term use — no consumables, no refills needed.

ODORUN's Core Advantages:

- **Instant deodorization:** Removes toilet odors within 1 second.
- **Hygienic and safe:** No smell, no residue, no adhesion, no replacement, no contact.
- **Clean and comfortable:** Keeps bathrooms consistently fresh, ideal for families, guests, and staff.
- **Quality-of-life upgrade:** Turns every toilet into an odor-free toilet, providing users with an elegant and comfortable experience.

Why ODORUN Matters

In modern society, high-tech innovations emerge constantly, yet the basic pain point of bathroom odor has never been thoroughly solved. Even with advanced ventilation and air-freshening products, odors still diffuse and linger.

ODORUN removes odor directly at the source, preventing diffusion, adhesion, and residue — ensuring that every bathroom visit is clean, comfortable, and odor-free.

Households can use bathrooms with peace of mind, workplaces maintain high hygiene standards, and everyone benefits from a more pleasant restroom experience.

The ODORUN Everyday Experience

After countless brainstorming sessions and development efforts, a revolutionary solution emerged — one that combines cutting-edge technology, convenient operation, and long-term hygienic advantages.

Once ODORUN is installed, every toilet instantly becomes an odor-free toilet. The bathroom environment is renewed — no embarrassment, no lingering odor, and no hygiene concerns.

It is not just a product, but a lifestyle upgrade that makes every user feel comfortable, reassured, and reliant on it.

Where ODORUN Can Be Used:

- **Homes:** No awkwardness or discomfort among family members; bathrooms stay fresh and pleasant.
- **Workplaces:** Employees use the restroom without worry, improving workplace hygiene and satisfaction.
- **Public facilities:** Restaurants, hotels, and other public restrooms remain consistently fresh, leaving a strong positive impression on guests.

A First in a Century

- ODORUN is the first device in a hundred years that can truly eliminate toilet odor.
- Unlike traditional odor-masking or odor-absorbing methods, it solves the problem at the source, ensuring bathrooms remain clean, fresh, and odor-free at all times.
- It is fast, efficient, and durable — install once and enjoy long-term improvement.

Join the Odor-Free Lifestyle

In an age of AI and Spaceflight, why still live with odor everyday? ODORUN makes odor-free toilets a reality — improving everyday life, ensuring hygiene, and enhancing comfort.

ODORUN — No more smelly bathrooms. Ever.
