ICC-ES Announces New Electrical Division, Powering the Future of Electrical Compliance

Program provides comprehensive support for electrical manufacturers, backed by decades of code compliance expertise

Brea, CA – ICC Evaluation Service (ICC-ES) is extending its long-standing expertise in rigorous product evaluation and certification for the building sector to meet the emerging needs of the electrical automation market. Backed by decades of experience, ICC-ES supports manufacturers developing technologies such as:

- Hazardous Location (HAZLOC) Equipment
- Electrical and Electronics equipment
- EV Supply Equipment (EVSE)
- Energy Storage Systems (ESS)
- Distributed Energy Resources (DERs)

ICC-ES currently provides four electrical services designed to streamline initial evaluation and prepare products for a successful compliance pathway:

1. **Pre-certification and Pre-compliance Services** to identify issues early in the design cycle.
2. **Factory and Supplier Audits** for Electrical Manufacturers such as quality system and process reviews, documentation and traceability checks.
3. **Technical Training and Capacity Building** via live and virtual classroom sessions and instructor-led workshops for engineering and quality teams, including specialized HAZLOC training to build strong fundamentals.
4. **Global Concierge Services** to navigate complex international certification requirements, offered as a single point of contact solution for manufacturers to market their products globally.

"The electrical industry is at a defining moment," said Gurvinder Chopra, Vice President of Electrical Services at ICC-ES. "We are launching a new global workforce in electrical conformity assessment - built on technical excellence, unwavering integrity, and a human-centered client experience focused on safety. ICC-ES is here to power innovation - we invite manufacturers and passionate professional engineers to join us in building a new standard for electrical safety and exemplary service."

As ICC-ES advances its accreditation scope, the ICC-ES Electrical Division will deliver globally recognized testing, inspection, and certification services that will help electrical and automation manufacturers bring safe, compliant products to market quickly and efficiently.
