

FOR IMMEDIATE RELEASE

Unikoo Glass & Hardware to Showcase New Patent-Pending
Soft-Close Shower Door Series at IBS 2026

Santa Ana, California — February 2026 — Unikoo Glass & Hardware, a fast-growing manufacturer and supplier of architectural glass and shower door hardware solutions in North America, is proud to announce its participation in the **2026 International Builders' Show (IBS)**, where the company will debut several **new patent-pending soft-close shower door series** designed specifically for the evolving needs of modern residential and commercial bathroom spaces.

With over eight years of experience serving distributors, glass contractors, and builders across the United States, Unikoo continues to expand its product innovation roadmap in response to increasing market demand for safety, durability, and user-centric design in bathroom enclosures.

Introducing the Next Generation of Shower Door Systems

At IBS 2026, Unikoo will unveil its latest line of **soft-close sliding shower door systems**, engineered to:

- Provide a controlled, quiet closing experience
- Reduce impact and long-term wear on hardware components
- Improve user safety by minimizing slamming risks
- Extend product lifespan in high-use residential and hospitality environments

Each new series integrates Unikoo's proprietary soft-close damping technology within a sleek, frameless design—offering both **functional performance** and **contemporary aesthetics** that align with today's bathroom trends.

These innovative systems are currently under **patent-pending protection**, reinforcing Unikoo's commitment to R&D and product differentiation within the North American bath hardware market.

Built for Builders, Designed for End Users

As a trusted partner to:

- Glass Contractors
- Kitchen & Bath Dealers
- General Contractors
- Residential Developers
- E-Commerce Retailers

Unikoo's new soft-close series is engineered with **installation efficiency** and **SKU standardization** in mind—helping project teams streamline procurement and reduce on-site adjustments without compromising design flexibility.

The systems will be available in multiple finishes including:

- Matte Black
- Brushed Nickel
- Chrome
- Satin Brass

And are compatible with standard opening configurations frequently specified in North American residential construction.

Expanding Innovation Across Distribution Channels

As Unikoo continues its multi-channel growth strategy—spanning wholesale distribution, independent dealer networks, and leading e-commerce platforms such as Shopify-based independent sites and major U.S. home improvement marketplaces—this new product launch represents a key milestone in the company's transition toward **premium, performance-driven shower enclosure solutions**.

Following IBS 2026, the new soft-close shower door series will be made available through Unikoo's warehouse network in **California and New Jersey**, supporting fast fulfillment for both East and West Coast partners.

Visit Unikoo at IBS 2026

Attendees of the 2026 International Builders' Show are invited to visit the Unikoo Glass & Hardware booth #S10053 to experience live demonstrations of the new soft-close shower

door systems and connect with the Unikoo product development and sales teams.
