

Terra Grip Anchors Announces Product Launch and Pre-Sale

New Concrete-Free Footings for Decks, Sheds and Other Outdoor Structures Now Available for Pre-Order

Denver, CO – December 17, 2025 – [Terra Grip Anchors](#) - an innovative new concrete-free footing for deck, sheds, fences and other outdoor structures – announces its product launch and pre-sale.

Designed for both professional contractors and DIY-ers, patented Terra Grips are the smarter, faster and stronger way to build. Terra Grips are easy to install, without the mess, weight or complexity of traditional concrete footings. Anyone can achieve professional-grade results with less time and effort. All you need is a standard impact driver for a one-person install.

Terra Grip Anchors are inspired by nature and mimic the root system of a tree for strong, stable anchors in virtually any type of soil. The textured galvanized steel grips the soil for superior load carry. The anchor and rods system is pre-engineered for consistent structural performance.

4644.

“Having been in the residential construction business for many years, probably the most burdensome thing about building a deck is to dig the foundation footings,” shared Bahman Azarm, Founder and CEO of Terra Grip Anchors. “Terra Grip is just going to simplify that tremendously.”

Ideal for backyard projects, this concrete-free footing solution is environmentally friendly with little soil disturbance and no mess. Terra Grip Anchors can easily be removed and/or moved with little residual impact.

Contractors and retail customers can visit [TerraGripAnchors.com](#) to learn more and place their pre-sale order. Units are \$286 plus tax and are expected to start shipping in March 2026, just in time for spring construction projects. Volume discounts are available.

Specialty retailers interested in carrying Terra Grip Anchors can contact info@terragripanchors.com or call 203-692-

About Terra Grip Anchors

Terra Grip Anchors are the smarter, faster and stronger way to build. Whether you are constructing a deck, shed, fence or other structure, the patented Terra Grip Anchors system offers a foundation you can trust. Terra Grip Anchors are distributed in the US and Canada by Outdoor Venture Group.
