

E-ZIP SCREENS

UNIQUELY DESIGNED

IMPROVE YOUR OUTDOOR LIVING SPACE

The Eclipse E-Zip retractable shading system provides easy, touch-of-a-button control for an expanded living space. Your custom made, professionally installed exterior screens will provide on-demand control of the sun's glare and harmful UV rays, while limiting rain penetration. Your new E-Zip units can completely prevent wind and insects from entering your enclosed porch or patio areas.

TO MEET YOUR NEEDS

PROVIDE GLARE CONTROL & ADD PRIVACY

Eclipse offers three different-sized cassette housings and dozens of open weave and solid fabrics to meet your unique needs. Select a dark colored fabric for added privacy during daytime hours while maintaining a full and clear view of your surroundings. Eclipse E-Zip screens will help to reduce your cooling costs, stop direct sun glare and prevent fading of your home's indoor and outdoor furnishings. You may opt for either a solid fabric or a tight woven fabric to help control outdoor temperatures.

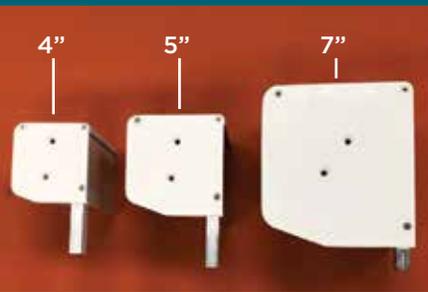

HEAT & BUG PREVENTION AT A TOUCH OF A BUTTON

Exterior mounted solar screens have all the benefits of interior shades just with more efficiency. They greatly reduce the sun's heat from outside of the glass or opening, without interfering with existing interior window coverings. As for bugs, all of the essential fabrics Eclipse has to offer will stop those annoying pests from sneaking into your home or patio/deck, including No-See-Ums.

UNIQUE FEATURES OF THE E-ZIP PRODUCT LINE

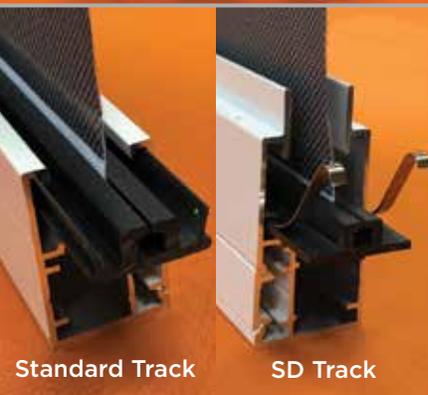

SIZED RIGHT FOR YOUR APPLICATION

Based on your needs, your Eclipse dealer will select the ideal cassette size to protect your fabric. All Eclipse cassette housings are two-piece powder coated, extruded aluminum which offers superior strength as compared to other brands' thin, wet painted roll form housing.

BIGGER IS BETTER

Eclipse E-Zip units start with the largest roller tube possible, depending on cassette housing for a smooth flat fabric. A strong, sag-resistant roller tube offers better visual clarity through the fabric and exceptional overall product performance.

THE KEY TO SMOOTH OPERATION

To guide the fabric as it's extended and retracted, we offer two styles of sidetracks. Our standard E-Zip tracks rely on dual durometer extrusion that reacts to the changing environmental conditions. For larger units, we offer our patent pending, Super Duty (SD) tracks with stainless steel spring clips which allow for greater flexibility and increased side tension. The spring clips facilitate smooth operation without any side fabric wrinkles.

LONG-TERM, TROUBLE-FREE DESIGN

Another key component of a well-designed and optimally-performing exterior screen is the hem bar. Again, Eclipse offers two versions of powder coated, extruded aluminum hem bars based on overall unit size. Our standard hem bar is ideal for small to medium-sized units, and our Super Duty (SD) hem bar is the most rugged design available with specific designs for larger installations. This superior hem bar - coupled with our unique hem bar end gliders - eliminates wind-related bowing and sidetrack jumping.

FEATURES & OPTIONS

PRODUCT FEATURES

E-ZIP SCREENS

Eclipse E-Zip screens utilize 3 sizes of rugged aluminum extruded cassette housings to protect your screen fabrics from the elements. Please note all sizes are available in all fabrics:

- 4" Cassette Box up to 14' wide x 12' drop.
- 5" Cassette Box up to 24' wide x 20' drop.
- 7" Cassette Box up to 26' wide x 20' drop.

CUSTOM INSTALLATIONS

For full custom installations, we offer recessed installation brackets as well as recessed track mounting. If interested in these options, please consult your dealer.
