## Add Character to your Entryway with Spotlights™ Doorglass *Authentic Design for Architecture Enthusiasts*

**ZEELAND, Mich. – February 4, 2014** – [ODL, Inc.](#), a leading building products supplier of decorative and clear doorglass and entry treatments, has launched its line of Spotlights™ doorglass, adding to its extensive doorglass collection.

“ODL is committed to meeting the design needs of builders and homeowners alike,” says Roger Finch, senior distributor channel marketing manager, ODL USA. “In fulfilling those needs, we’ve realized the importance of evolving over time, while embracing individual architectural styles. The new Spotlights collection does just that, by combining the growing trend for renovations, remodels and sustainability with authentic design.”

Finch explains that the Spotlights collection was created to enhance the unique style of existing homes, whether it be Georgian Revival, Mid-Century Ranch, Dutch Colonial, Bungalow or even Contemporary. As more homeowners opt to renovate their homes, Spotlights designs help them stay true to their roots, while still enhancing curb appeal. The white, low profile PVC frame assists in this process as it can be painted to match any preferred color.

The Spotlights collection is comprised of three specific doorglass sizes – 7.5 inches by 7.5 inches, 12 inches by 12 inches and 22 inches by 3.5 inches. Additionally, each size is available in any of the four glass options – chain link, cubed, frosted and clear. Configuration possibilities are endless, as both horizontal and vertical arrangements are available, in addition to varying options for quantity and orientation. Furthermore, both size and glass option can be mixed and matched to complement various home aesthetics ranging from those built in the 1920s to today.

The four glass options provide unlimited door customization possibilities based on individual tastes and preferences, and offer a range of privacy levels. **Chain link glass** (pictured above left), **cubed glass** (pictured above right) and **frosted glass** (pictured

left) allow for heightened privacy, while **clear glass** (pictured below right) provides complete transparency for residents. No matter which style is chosen, this doorglass collection is sure to meet any homeowner's design requirements.

Not only does Spotlights doorglass upgrade the style of existing homes, its insulated glass and well-constructed frame units also make it an extremely energy-efficient choice. And because builders and homeowners can vary their choices in style, shape and size, pricing is particularly flexible.

For more information about these designs and ODL's complete collection of clear and decorative doorglass, visit [www.ODL.com](http://www.ODL.com).
