## PANELS

Who doesn't love playing with building blocks? With B.PUBLIC you can go from digital design to installation with wood-framed fully insulated panels for high performance in a matter of weeks. We build with craftsmanship, quality, and rigorous tolerance and offer cost and performance predictability for low-rise residential new construction with endless architectural style.

R-35 & R52 wall  
R-59 & R80 top  
R51 floor panels

IMAGINE BUILDING DIFFERENTLY  
TOOLS FOR PROFESSIONALS

## DESIGN

B.PUBLIC Prefab has invested in tools and technical support for architects and designers to design with our components. Incorporating off-site panelized building envelopes is new to the industry. We offer video tutorials, one-on-one training, and direct project support to those interested in specifying high-performance components.

B.PUBLIC offers cost and performance predictability for low-rise residential new construction with endless architectural style.

# OFF-SITE

PANELS FOR BETTER ENVELOPES  
START BUILDING

## OFF-SITE

The future is here! Construction with components that are built in a controlled environment to demanding specifications, which ensures craftsmanship, quality, and predictability. By leveraging off-site you can improve building performance, speed construction, dramatically lower waste and maintain control. By merging the advantage of off-site with the best of on-site construction we can tackle more without losing control or building traditions.

To learn more - join a zoom conversation with our staff or send plans for an estimate on your next project!

# TRAINING

IMAGINE BUILDING DIFFERENTLY  
CHANGE WITH SKILLS

## TRAINING

Incorporating off-site panelized building envelopes is new to the industry. We offer training to our building partners from online tutorials, one-on-one training, to specialized in-person hands-on training. B.PUBLIC Prefab's builder/installer training program is a 3-day workshop with high-performance materials, reading and estimating off-site plans, hoisting and crane experience and practical demos covering site conditions, foundation assessments, and building a real B.PUBLIC structure!

Visit our website to catch the latest programs for builders and join future events.

# HOMES

PANELS FOR BETTER ENVELOPES  
PLANS FOR PERFORMANCE HOMES

## B.PUBLIC HOMES

B.PUBLIC Homes are designed for comfort, health, and generations of low-energy performance. Base home plans are available for developers, builders, and consumers. All plans are customized for the site, foundation type, exterior finishes, and architectural style.

To check-out plans or start to design with our staff, visit our website.
