## **Caregiver Smart Solutions, The Best Way to Monitor Loved Ones As they Age In Place.**

**Pompton Plains, NJ, December 13, 2022** – At Design & Construction Week 2023 Booth #W2056 in the IBS Start-Up Zone Located in the West Hall next to IBS Home Technology Pavilion and in the nextBUILD section. Caregiver Smart Solutions is introducing the Aging in Place Core Kit which uses smart sensor technology, the power of Machine Learning, and Artificial Intelligence, to ease the burden on caregivers around the world. Tiny, non-intrusive sensors track the habits, movement, and patterns to provide family members with reassurance that things are as they should be, all without the use of invasive video cameras or wearable tracking devices.

For builders, remodelers, developers, and designers that work with age-restricted, independent living, or assisted living projects the core kit will enable your clients to have more Peace of mind and trust in you. Our smart sensors are placed around the home and monitor habits to understand patterns. They feed this data to a customizable app that reports critical information including when the person wakes, how often they are eating, taking medicine, and visiting the bathroom, along with movement throughout the home.

The app provides real-time insights for the early detection of problems as well as changes in patterns. Alerts can be personalized per user, so multiple family members can obtain different insights.

The Core Kit includes 13 Sensors:

- Movement sensors in 5 rooms
- Medicine cabinet, refrigerator, temperature, and humidity sensors
- Front and side door sensors
- 3 emergency buttons

The retail price of the kit is \$597 with a \$59 per month subscription.

“In these challenging times, surrounded by Covid, many of us can't see our loved ones in person. We are constantly worried about how they are doing,” said Ryan Herd, Founder, Caregiver Smart Solutions. “Our solution is designed to provide peace of mind to people who have loved ones who are aging in place at home.”

In addition to the Core Kit, add-on kits are available for the basement, garage, and stairs..

Basement Kit – Retail price of \$294 and monthly subscription fee of \$12

- 6 Sensors: 1 Door, 4 Movement, 1 Emergency Button

Garage Kit – Retail price of \$147 and monthly subscription fee of \$6

- 3 Sensors: 1 Movement, 2 Door

Stair Kit - Retail price of \$147 and monthly subscription fee of \$4

- 2 Movement Sensors

### **ABOUT CAREGIVER SMART SOLUTIONS**

Caregiver Smart Solutions was founded by Ryan Herd to help adult children in their care of aging loved ones. Designed for the Family Caregiver, In-Home Caregivers, Occupational Therapy (OT), Assisted Living Communities (CCRC), and more. He can be reached at 888-585-5022 or via [Ryan@caregiversmartsolutions.com](mailto:Ryan@caregiversmartsolutions.com)

“By using tiny non-invasive sensors placed discreetly around the home and AI for Aging in Place, we provide a proactive solution that enables your loved ones to retain their independence, dignity, and live on their own as long as possible while reducing your stress through Peace of Mind says, Herd”.

**No cameras, No intrusion, Just incredible insight!**
