Scott Duman
President, Residential Home Construction Group, Building & Construction Division
ECI Software Solutions

Scott Duman is president, Residential Home Construction Group, Building & Construction Division for ECI Software Solutions, a global provider of cloud-based business management software and services. Duman brings more than 35 years of experience in applications systems design and development to his role, where he's focused on driving the vision, strategy and innovation of ECI's suite of products designed for the residential construction industry. He remains active in research and development of technology and product enhancements while also pursuing an active M&A strategy. Previously, Duman served as president and CEO, as well as a board member, at American Management Enterprises, Inc. (Mark Systems).

Monica Wheaton
Vice President of Customer Success, Residential Home Construction
ECI Software Solutions

Monica Wheaton is vice president of Customer Success, Residential Construction Division for ECI Software Solutions, a global provider of cloud-based business management software and services. Wheaton brings over 25 years of experience in both the construction industry as well as the software and technology space to her role, where she's focused on helping small- and medium-sized businesses find success through education and resource development. Previously, Wheaton served as CEO for nearly 14 years at Builder Partnerships, the authoritative resource that connects builders, manufacturers and service providers to improve profits, relationships and knowledge.

Andrew Clark
Vice President of Product Management, Residential Construction Division
ECI Software Solutions

A founding member of Lasso CRM, Andrew Clark is VP of Product Management, Residential Construction Division for ECI Software Solutions, a global provider of cloud-based business management software and services. Clark brings 20 years of experience in software technology to his role, where he's focused on creating complete business solutions for real-world market cycles to drive the homebuilding, selling and buying industries forward. Previously, Clark has served in a variety of roles, including full stack development, UI/UX and product development.

Bob Cain
Business Unit Leader, BuildTools and Bolt, **Residential Construction Division**
ECI Software Solutions

Bob Cain is business unit leader of BuildTools and Bolt for ECI Software Solutions, a global provider of cloud-based business management software and services. Cain brings 25 years of experience in residential construction to his role, where he's focused on strengthening support, driving software development and expanding the product team of experts to improve the overall customer experience. Previously, Cain served in senior management positions for MarkSystems, ECI's flagship enterprise resource planning software for residential home builders.

Brad Haubert
Senior Consultant, MarkSystems, Residential Construction Division
ECI Software Solutions

Brad Haubert is a senior consultant of MarkSystems, Residential Construction Division for ECI Software Solutions, a global provider of cloud-based business management software and services. Haubert brings more than 30 years of experience in homebuilding to his role, where he's focused on elevating customers through industry-focused best practices and expert insights on MarkSystems, ECI's business management software for home builders in the residential construction industry. Haubert pulls on his real-world experience in homebuilding—he's helped build over 1,000 new homes—real estate, business management and process improvement.
