

Chameleon®

Adaptable Hose System

The new revolution in central vacuum cleaning and convenience is here!

Chameleon® combines the benefits of retractable hoses with the affordability of standard central vac inlets. The result is a true hybrid system of hose management and storage!

It starts with installing one Chameleon retractable hose valve and several standard valves in your home. (If you already have a central vacuum, you can use your existing valves!)

You carry the Chameleon hose to the standard valves for complete cleaning coverage. When finished, the hose stores in the Chameleon tubing system. It's that easy!

The Vacuum System that Adapts to Your Cleaning Needs

Chameleon®
Adaptable Hose System

Convenient. Clean. Chameleon®

Simple to Use All Over Your Home

Remove the hose from the Chameleon valve and engage the valve seal.

Plug the hose into your standard central vacuum valve.

Vacuum. When finished, store the hose back into the Chameleon valve.

Accessories for All Your Cleaning Needs

Chameleon adapts to your every cleaning need with a wide variety of attachments. This includes air-driven and battery powerheads for carpets and rugs as well as bare floor brushes and dust mops for hard-surface flooring. Crevice tools, dusting brushes and upholstery tools are available, and there are even specialty tools to use for your car and garage!
