

GenStone®

Keystone

Charcoal Base
with Burgundy and
Beige Tones

“

“I redid deck facing with this ledger rock product. I was very careful to measure several times before I cut. It cuts like butter. Very happy with the end project.”

—JoJo, Olympia, WA

“

“I finished this project a few months ago and we are very satisfied with the results. We have gotten many compliments on how nice the stone looks. The panels were very easy to cut and install. I chose to use adhesive on the back of the panel along with screws to attach them to the wall.”

—Shelton, Navarre, FL

“

“Our house was starting to lose a little of it's curb appeal as do many houses after 20 years. GenStone was definitely the right approach... We love the look and many of our neighbours were impressed with the results. We couldn't be happier with the product or the great communication with the company during the order process. Thanks GenStone.”

—Ted, Halifax NS, Canada

“

“I compared Genstone to competitors and Genstone by far is the most realistic, as can be seen in the photos. Installation is a breeze with simple hand tools and drill for screwing in stone pieces. Genstone instructions and videos are very helpful as is their staff. Thank you!

—Jeff Lindo, Wading River, NY

Keystone Color Profile Inspiration

Keystone Colorado is tucked away in the Rocky Mountains and only a two-hour drive from GenStone Headquarters. As one of the nation's most beloved destinations, Keystone is known for its epic scenery all year long. The GenStone design team used spring and summer as their inspiration for this favorite faux stone style.

The warmer months at Keystone bring rich burgundies, beiges, and slate colors that are unmatched anywhere else. Capturing these colors for our Keystone faux stone panels is something we are incredibly proud of. We know those who choose Keystone for their next project will be proud too. Order a sample today to try Keystone with your next project.

Try out our visualizer to see if Keystone is the best color choice for your next project!
