“

“We absolutely love our stone from GenStone. Cutting it was a piece of cake with a hand saw, install was easy with construction adhesive and a few screws. Overall it came out excellent.”

—Joseph, Central, NJ

“

“This product is very user-friendly, lightweight, and looks like real slate/shale/sandstone... See for yourself in the photos. Any homeowner can install this!”

—Jam, Rochester, NY

“

“I recently renovated my screened-in porch and wanted to add something extra to make it stand out. A few searches later, I found GenStone’s stacked stone panels, and was sold! It was incredibly easy to install and I couldn’t be happier with the result. Definitely will be using for future projects!”

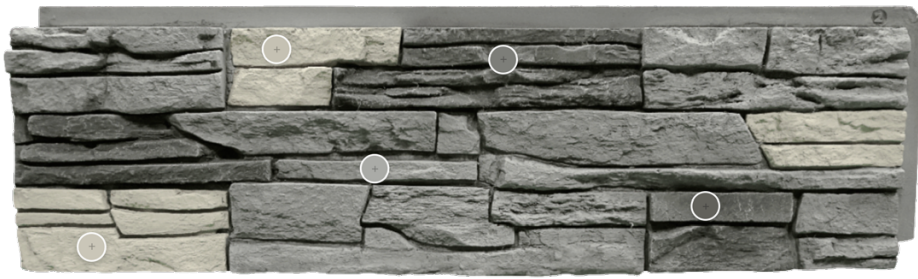

—Henry, Langhorne, PA

“

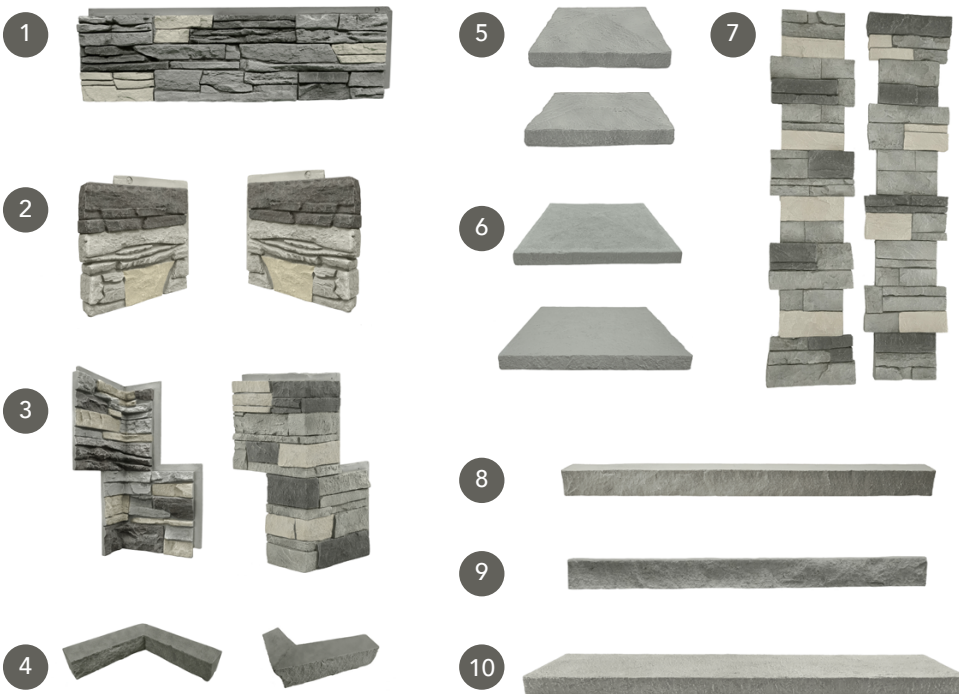

“We began the process by ordering a full panel to get all the colors variations. We worked with one person at Genstone to help design our project, thanks Ryan. It was easy to install after watching the videos. Easy to cut using a jigsaw. Ryan figured out how much product we needed and he was spot on. We almost didn’t finish in time as the neighbors kept stopping to ask us what the product was. We even gave away one of our throw-away pieces and wrote the product contact info on the back so they could reach out to Genstone. Highly recommend. Thanks, Genstone for giving us a beautiful focal pieces to the front of the house (and a new coat of paint didn’t hurt either).”

—Bradenton, FL

Northern Slate Color Profile Inspiration

Strong and traditional, Northern Slate was inspired by the gray stone skyscrapers and stunning natural stone formations in the state of New York. Our GenStone designers found creativity in the contrast between the powerful NYC skyline and the serene upstate landscape, where naturally occurring slate is abundant.

Genstone Northern Slate faux stone panels feature a stunning, yet subtle design that compliments well with any style. They feature natural elements with refined tans, light grays, and dark charcoal blends. Whether urban or earthy, Northern Slate faux stone is a strong choice for your project.
