AridDek
waterproof deck system

The innovative tongue-in-groove design of the AridDek[®] Waterproof Deck System creates a seamless single layer surface with an integrated hidden gutter system that channels water away from your structure to create a beautiful, low-maintenance deck surface with usable dry outdoor space below.

AridDek is engineered to create a completely watertight deck surface. The easy-to-install, low-maintenance deck boards add both value and extra living space in one application. Each interlocking board is secured with a hidden fastener system for a continuous, slip-resistant deck surface.

Perfect Your Outdoor Living Space With The AridDek Waterproof Deck System

MATERIAL: 6005-T5 series marine-grade aluminum. (*Extruded for precision.*)

FINISH: A low-maintenance, powder coated finish that is slip resistant and provides traction in wet or dry conditions.

STAYS COOLER TO THE TOUCH: Even in the hottest environments, aluminum deck boards stay cooler to the touch than traditional deck materials like composite boards or wooden deck planks.

DURABLE: Will not split, decay, crack, or rot; will not become brittle in extreme cold.
