

Introducing **SilentAire** by ETi

SilentAire is a hybrid lighting & air disinfection solution that combines ambient LED lighting and **GUV** disinfection technology with an extremely quiet built-in circulation system that is **100% SAFE for people, pets, and occupied spaces while effectively killing 99.9% of bacteria, mold, fungi and viruses in the air.**

SilentAire LED light fixtures contain a patented circulation system that draws ambient air from a room into a sealed UVC disinfection chamber. The air is treated and disinfected with UVC wavelengths and then is recirculated back into the room as purified air.

SilentAire FEATURES:

- Patented SilentAire circulation system continuously disinfects ambient air and recirculates purified air back into the space
- Sealed internal UVC LED germicidal disinfection chamber ensures ZERO direct UVC exposure
- No special controls, safety measures, or training required
- Safe and effective GUV disinfection for any application
- Schools, Offices, Transportation, Healthcare Facilities, Retail Stores, Restaurants, Bars, Gyms, Theatres, Studios and any other indoor space

100% SAFE for people, pets, and occupied spaces

- Proven Germicidal UV Technology
- Kills Bacteria
- Kills Mold & Fungi
- Kills/Deactivates Viruses
